

The Woertz guarantee

Woertz flatcable products and innovations have not only been developed continuously as a whole, but the compatibility of the parts is also subject to continuous monitoring and refinement.

We are the only manufacturer to produce the flatcable and connectors ourselves. Our production facilities have been equipped with the latest technology and control equipment. There is no better way to achieve the optimum!

FLAT CABLES WITH CONNECTORS from WOERTZ therefore set new standards for quality and reliability.

As a result for our customers, we extend the duration of our guarantee to 5 years for any manufacturing defects.

Woertz, inventor of the flatcable, stands behind its products and looks after the interests of its customers.
