Duplex Jumper LC-LC 50/125µ, OM3

Fiber jumper are well defined components in international standard of structured cabling ISO/IEC11801.

Due to many different network protocols created in the last 25 years , also a wide range of connectors had been developed. Some of them are still important today: LC, SC, E2000®, MPO/MTP

Fiber jumper(patchcord) are defined as shortest connection between passive interface and active deviceport, regarding structured cabling standard.

Rating of performance, known as category, as well as performance of total transmission channel, known as link class, makes differantiation of quality concerning RJ45 patchcords possible.
