

STACKABLE CONTAINER

Your automation partner

Industry 4.0 ready

SASI 4.0: High-performance, sustainable storage built for next-gen automated warehousing in e-commerce, retail, and industry. »

Industry 4.0 ready

Take control of your automated warehouse with a container designed for both longitudinal and lateral movement. Integrated vertical lifting pockets enable seamless palletizing while full compatibility with AGVs and modern shuttle systems keeps your operation running smoothly.

Fully sustainable

Reduce your environmental impact without sacrificing performance. Manufactured from recycled polypropylene and 100% recyclable at end of life, SASI 4.0 supports your sustainability goals throughout its long service life.

Conveyor protection

Keep your automation flowing with full lower bumpers and wrap-around corners on all sides. Optimized guiding on conveyor belts means fewer disruptions and smoother operations.

Drainage holes

Meet fire safety requirements effortlessly with multiple drain holes that quickly remove excess water. Fully compliant with FM Global regulations for peace of mind.

Customisation options

Adapt to your specific needs with options including:

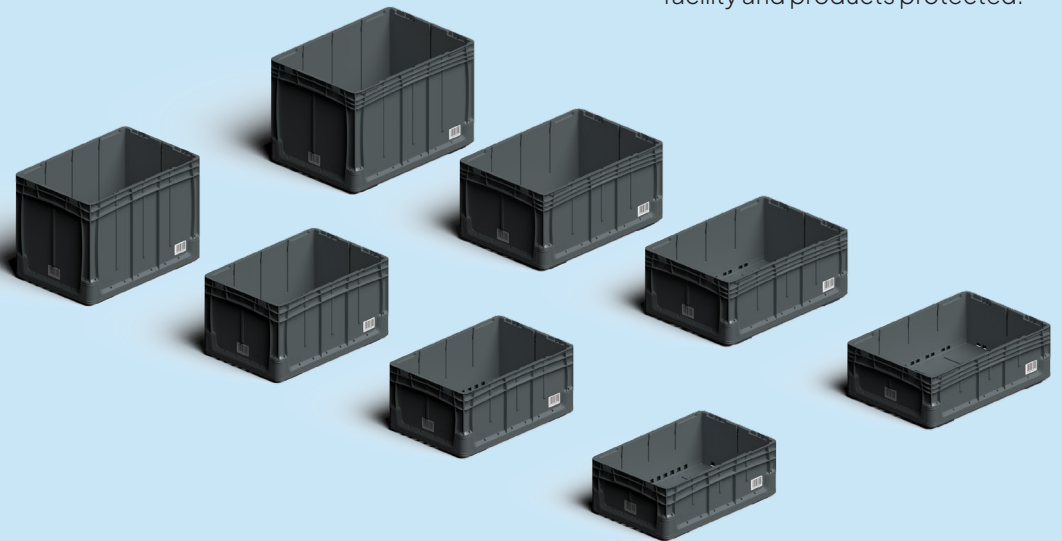

- Open handles for easier manual handling
- Ventilated sides for air circulation
- Additional horizontal bumper ribbing for extra protection
- IML in 3 possible locations on each short and long side wall

Load stability

Trust your cargo to a container with maximum 5mm base deflection. Long side support ensures even weight distribution for loads up to 50kg.

Retaining leaks

Prevent contamination with a 0.75l leak reservoir in the base. FM Global compliant design keeps your facility and products protected.

Noise reducing welded base

Create a quieter workplace with sound skirts on the outside of the welded base plate. The large, flat area provides stability and smooth roller transfer while reducing impact and sound levels.

Technical data

The 650x450 footprint easily accommodates a 600x400 cardboard box
