

Magnum Optimum® 1208

The industrial logistics game-changer

Schoeller Allibert

Versatile modular system

Designed for automotive, retail, and logistics, the Magnum Optimum 1208 combines a compact 1200x800mm footprint, low weight, and a 69% folding ratio to reduce transport and return costs. »

Maximised truck payload and profitability

Cut costs with every journey. 7% lighter than its predecessor yet delivering 12% more volume, the Magnum Optimum 1208 significantly increases truck payload versus any folding container on the market. The result? Fewer trucks, lower fuel consumption, and a reduced carbon footprint.

Versatile modular system

Adapt your container precisely to your needs. The innovative Optiframe spacer adds 105 mm height with each step, optimizing volume for any cargo type. For automotive logistics, dunnages fit neatly inside folded containers, ensuring efficient returns and minimizing wasted space.

Versatile range sidewall options

It's because what makes MO1208 so versatile is the wide choice of sidewall setups. You can choose versions with four drop doors, just one, or none at all, it is all built on the same base model. That means you can tailor the design exactly to your needs.

Multiple identification options

Track your assets with confidence. Integrated A5 label holders, recessed bar code zones, and large marking plates on all four walls give you complete visibility. RFID and IoT ready, the Magnum Optimum 1208 adapts to your existing systems for maximum flexibility.

Ergonomics and handling efficiency

Boost productivity with every movement. Non-sequential folding and accessible locking devices allow a single operator to erect and fold the container from one side.

The unique push self-lock door improves ergonomics and maximizes labour savings, while deep openings on one side and one end ensure versatile, effortless loading and unloading.

Secure your loads with integrated strap locations and base angle pins.

A new footprint for smarter reverse logistics

Say goodbye to empty return costs. With a market-leading 72% folding ratio, the Magnum Optimum 1208 stacks up to 9 units in a standard truck and 11 in a mega trailer. This translates to 36% lower reverse logistics costs and 30% less storage space for empties compared to previous FLC generations.

Smooth and easy to clean

Protect your products and maintain hygiene standards. Smooth internal and external surfaces enable fast cleaning, prevent water retention and shield contents from damage. The optional lid adds protection and prevents contamination.
