

INTERMEDIATE BULK CONTAINER

# Powerful performance, planet-friendly design

# Excellence in every dimension

Engineered for the demands of aseptic food processing and high-speed filling lines, Combo Fructus delivers top hygiene, durability, and efficiency. »

## Built to deliver, built to last

The Combo Fructus® handles 1500 kg loads with confidence, stacking up to 6500 kg thanks to its robust double wall structure. The T-shaped locking system between sides and ends ensures maximum stability, while the watertight lid with strapping capability keeps contents secure.

## Work smarter, not harder

Reduce labour costs with Combo Fructus® reinforced base and skids, compatible with automated handling systems. Built for the long haul with 3200 kg dynamic load capacity—perfect for road, rail, and sea freight. Compatible with high-speed filling lines.

## One solution, three options

Select the perfect height for your logistics needs:

- CF 280 for refrigerated sea freight
- CF 300 for standard sea freight
- CF 315 for road and rail transportation

## Hygiene that means business

Eliminate contamination risks with 100% smooth surfaces from base to lid. No dirt traps, no water pockets, no compromise. The double wall design increases internal volume and handles high-speed filling processes with ease.

## One person, zero hassle

Unique side wall locking allows a single operator to erect and fold the Combo Fructus®. Save time with non-sequential folding, ergonomic handles, and reinforced base features that enhance safety and speed.

## Track, trace, identify

Make your containers work harder with customisation options that protect your investment. Add your logo and company name to enhance brand awareness, while multiple barcode and RFID options enable efficient fleet management.

## Smaller footprint, bigger savings

Achieve up to 73% folding ratio with the CF 315—one of the market's best. Stack 7 folded units in a standard truck to slash logistics costs and reduce emissions. All parts are replaceable, maximising service life. And when it finally retires? The entire unit can be recycled, further reducing your environmental impact.
