System 9000: Modular and flexible storage system

Modular Flexible System

Our System 9000 container series are a modular and flexible storage system, offering versatile options for small parts storage. This storage system is ideal for storing and conveniently accessing a wide range of parts, tools, and accessories. It is suitable for various applications, including assembly lines, aftersales, and maintenance services.

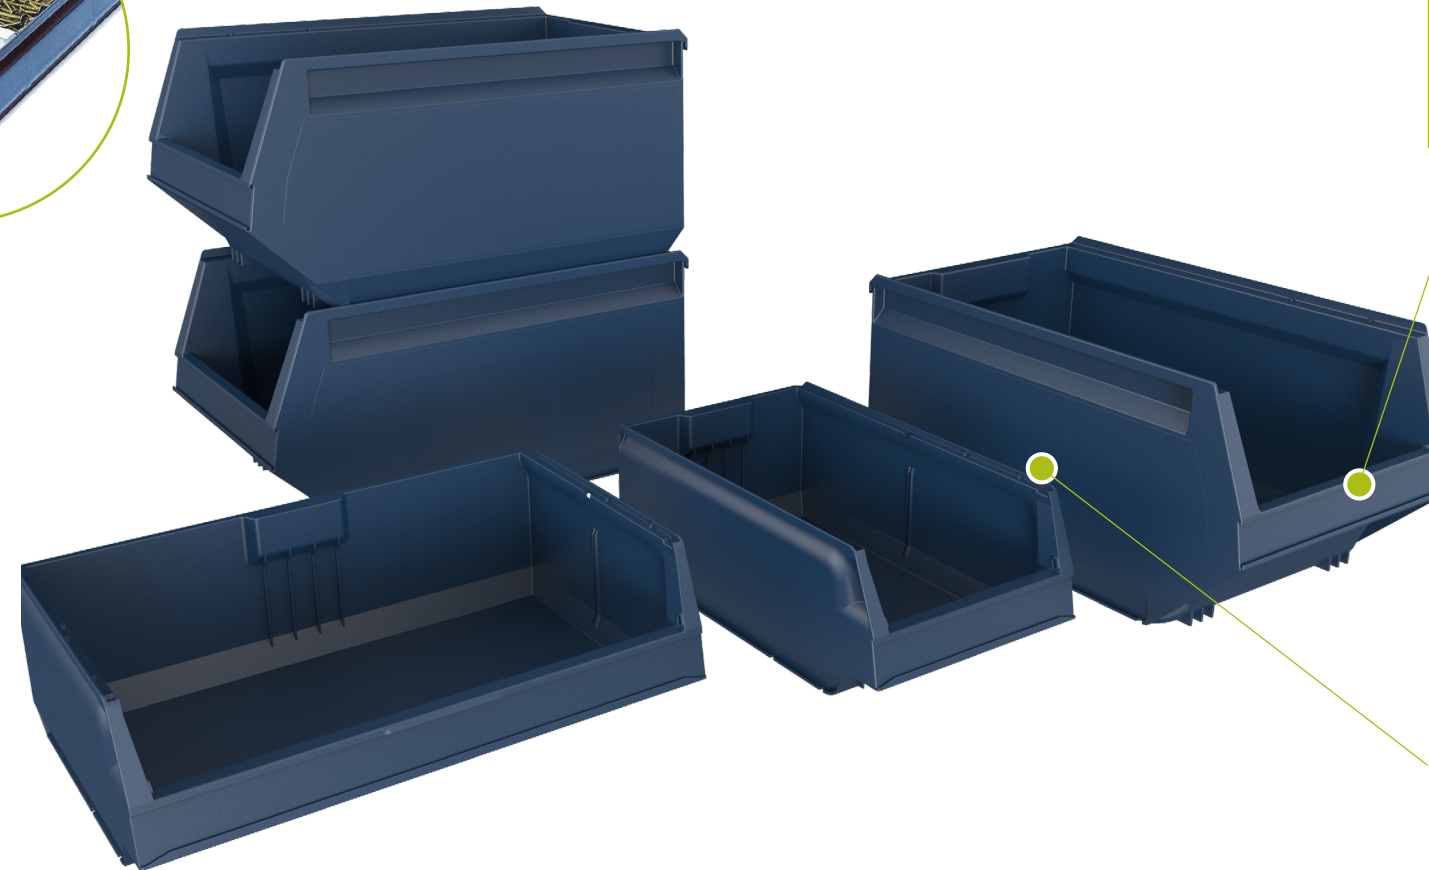

Unique Features

Our System 9000 range offers diverse options, each family boasting unique features:

- **45 Series:** These bins allow for labeling at both the front and end, enhancing content identification.
- **91 Series:** Equipped with two label zones on the short sides, they optimize identification.
- **Stackable Series:** This series are designed with spacious open fronts for effortless access to items, even when stacked. Additionally, they can be equipped with transparent front doors for convenient visibility and dust protection.

Versatile Range

The System 9000 range features a wide array of product families, each offering a variety of footprints and heights. This diversity caters to a range of storage and transport needs, ensuring flexibility and efficiency across different operational scenarios.

Easy Identification

These crates are designed with specialized label zones, enabling effortless identification of contents. These zones are strategically placed for high visibility, ensuring that content labels are easily readable.

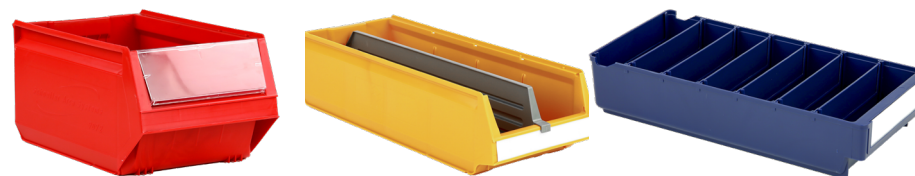

Space Efficient

The compact and clever design of the System 9000 minimizes wasted space between boxes, optimizing storage capacity. This feature allows for the storage of a greater number of different references on each level.

Customization Options

Our system 9000 series is fully customizable with a variety of available accessories, including width and lengthwise dividers, labels, and more.
