Schoeller Allibert

Innovating your logistics for a better world

Schoeller Allibert Services Rental Catalogue

Schoeller Allibert, Europe's leading manufacturer of plastic returnable transport packaging (RTP), now offers a range of products that are available to rent. Renting our products allows you to invest in - and benefit from - our high-quality RTP solutions at a fixed rate without the need for cap-ex investment. Our rental services enable you to flexibly upscale your fleet as necessary. Simply hire what you need, when you need it. The possibilities are truly endless: our Smartlink® enabled assets provide you with detailed information on geolocation, temperature, fill level and much more besides.

We are pleased to offer you three different packages:

1) Schoeller Allibert Services assets - Rent
- Schoeller Allibert owns the assets
- Asset is equipped with tag and a unique ID
- Choose the duration and type of contract
- Pay fixed monthly fee

2) Schoeller Allibert's assets equipped with Smartlink® asset tracking - Buy
- Customer has signed up for a bulk rental deal
- Customer has already bought Schoeller Allibert bulk assets
- Schoeller Allibert can retrofit device on Schoeller Allibert bulk assets - cost subject evaluation
- Customer pays a one-off retrofit cost, tag and monthly SmartLink® fee for connectivity

3) Use of non-Schoeller Allibert assets - Buy Back
- Customer owns assets made by a manufacturer other than Schoeller Allibert
- Schoeller Allibert purchases the assets under the terms of the 'SA Buy Back Scheme'
- Material analysis - if materials are approved they are then recycled and manufactured into new Schoeller Allibert branded assets
- Purchase of new Schoeller Allibert assets, tag and unique ID combined with a monthly Smartlink® fee

How SmartLink® works

SmartLink® makes your assets 'intelligent'. It allows you to achieve wireless control and enable the proactive maintenance of your fleet. The built-in sensor tracks and receives data via a variety of networks (GPS, Wifi, BLE...) and transmits that data twice a day. This data can then be reported on to gain useful insights to support asset management and optimization decisions.

Schoeller Allibert's rental assets are equipped with a barcode label and a SmartLink® tag. Each barcode label has a unique ID number and combined with the SmartLink® tag enables the asset to be tracked and traced. After activating your assets, all data can be accessed on the Schoeller Allibert SmartLink® platform.

- Lower insurance costs
- Fixed rent amount
- Asset recycling

What happens with returned assets?

When assets are returned, they get thoroughly washed, inspected and, if necessary, repaired. Schoeller Allibert will reuse all assets, meaning that our customers can replace their inefficient legacy fleet with best-in-class RTP containers. After its long working life, materials are not wasted, they get recycled and reused to create new high-quality assets.
