

The New Operating Model for Portfolio-Wide Cybersecurity

Protect and grow portfolio value through centralized management of security posture and cyber exposure.

96%

of customers' business-critical attack routes are blocked within six months.

88%

reduction in remediation time following a cyber incident.

87%

of customers improve ROI on their security budget.

Cybersecurity Is a Portfolio-Wide **Financial Risk**

Cyber exposure is no longer confined to individual portfolio companies - it has become a firm-level issue that impacts valuations, fund raising, governance, deal economics, and investment returns.

Investors, limited partners, boards, regulators, and buyers increasingly expect private equity firms to demonstrate consistent cyber oversight across the portfolio.

94% of PE firms
have absorbed losses from cyber-related disruption.

The Cyber **Center of Excellence** (CCoE) for PE Firms

Cye's CCoE enables private equity firms to consistently measure, manage, and reduce cyber exposure across every portfolio company – from due diligence to exit.

By combining AI-native exposure management, standardized maturity scoring mapped to NIST CSF 2.0, and quantified financial risk, Cye provides the visibility, governance, and consistency needed to protect portfolio value and strengthen exit readiness.

Protect Portfolio Value

Reduce cyber exposure before it impacts valuation.

Operate at Scale

Manage every portfolio company through one operating model.

Drive Measurable Improvement

Track cyber maturity and exposure reduction over time.

Sell with Confidence

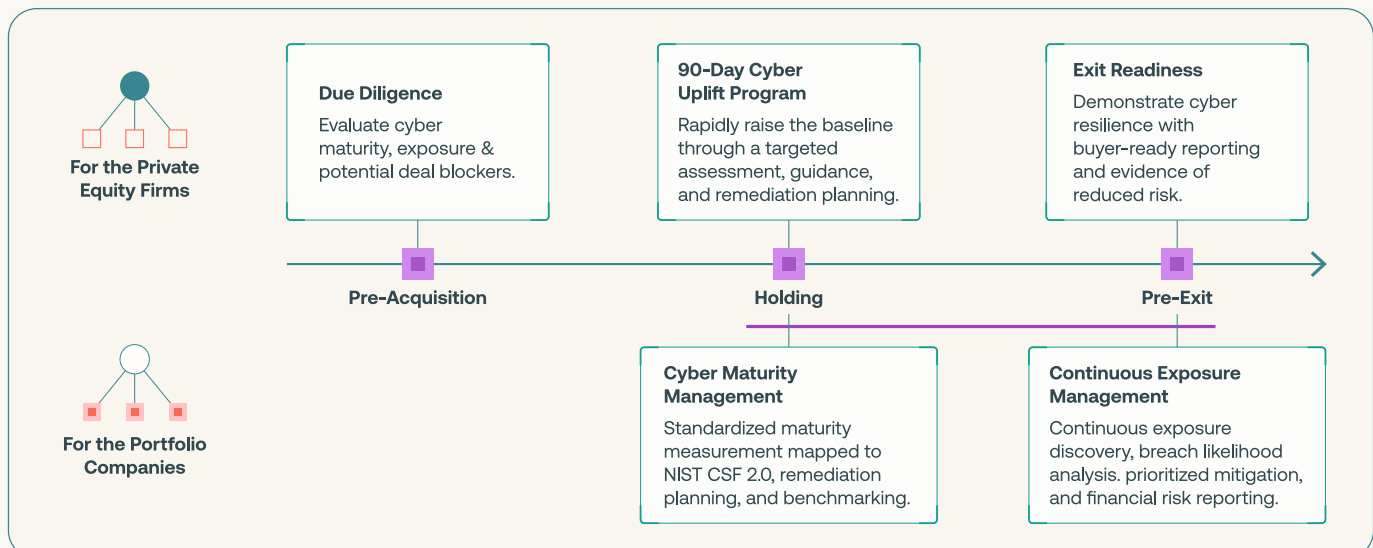

Demonstrate cyber resilience during buyer due diligence.

TRUSTED BY INDUSTRY LEADERS ACROSS THE GLOBE

How the CCoE Supports Every Stage of the **Investment Lifecycle**

Cye combines real-world cyber expertise with its AI-native exposure management platform to enable PE firms to manage their exposure from pre-acquisition to exit.

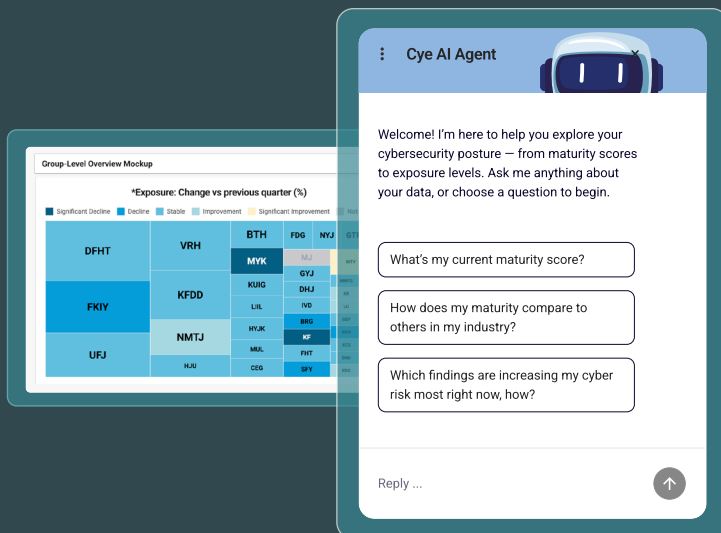

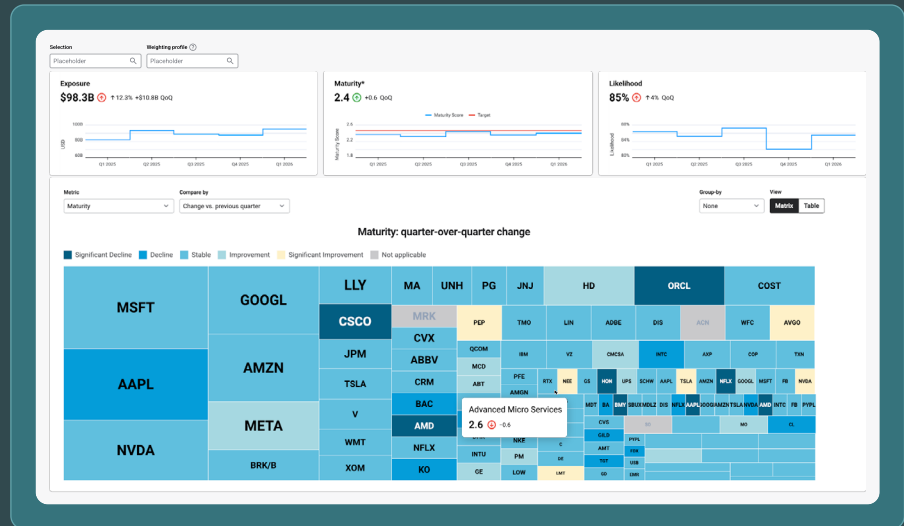

The Technology Behind the CCoE

Portfolio-Level Overview

Gain a real-time view of cyber maturity, exposure, and remediation progress across every portfolio company.

- Portfolio-wide dashboards
- Heatmaps identifying outliers
- Benchmarking and trends
- Executive reporting
- Drill-down to individual companies

AI-Generated Insights and Guidance

Ask questions in natural language and receive prioritized recommendations, executive reports, and portfolio-wide insights.

- AI-guided prioritization
- Executive summaries
- Portfolio & company drill-down
- Simulations and recommendations

NIST CSF Mapped Maturity Scoring

Measure and improve cyber maturity across the portfolio.

- AI-led mapping to NIST CSF functions and subcategories
- Portfolio-wide benchmarking
- Trend and progress tracking
- Targeted remediation planning

Why Cye

Built for
portfolio-wide
cyber programs

Proven support
across the full
investment lifecycle

AI-native technology
with business context
& cyber expertise

Continuous and
central management
of cyber resilience

Cye stands out in the way it drives the customers to improve their security posture. They are fast and data-driven, and are therefore able to advise on what activities quickly reduce risks.
