

# Tank-mix sheet

**Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.**

Always check individual product labels for any possible restrictions before making a tank-mix recommendation.

**Be mindful the additional use of tank-mix partners** can have the potential to cause crop damage. In particular, tank-mixes with EC fungicide formulations may result in transitory adverse crop effects.

Add the recommended quantity of Eagle® to the spray tank half-filled with the required quantity of clean water. Add the remainder of the water with the sprayer agitation system in operation. **Always maintain agitation during mixing and loading and until spraying is complete. Spray immediately.**

Do not leave the sprayer standing with chemical in it.

**Bayer CropScience will support the physical compatibility of tank-mixes of Eagle® with only ONE of the products listed below:**

## Fungicides

|                  |                 |                   |
