

# Tank-mix sheet

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

Always check individual product labels for any possible restrictions before making a tank-mix recommendation.

**In soft crops avoid the use of tank-mix partners** with the potential to cause crop damage when applied in tank-mix with an adjuvant. In particular, tank-mixes with EC fungicide formulations may result in transitory adverse crop effects.

Add the recommended quantity of Incelo® to the spray tank half-filled with the required quantity of clean water. Add the remainder of the water with the sprayer agitation system in operation. **Always maintain agitation during mixing and loading and until spraying is complete. Spray immediately.**

Do not leave the sprayer standing with chemical in it. Always add biopower® to the spray tank last.

**Bayer CropScience will support the physical compatibility of tank-mixes of Incelo + biopower with only ONE of the products listed below:**

Fungicides		
Amistar	Fandango®	Proline®275
Aviator®235Xpro®	Firefly®155	Talius
Ascra Xpro®	Flexity	Variano® Xpro®
Jaunt®	Boogie Plus®	Helix®
Arizona		

- No compatibility with tebuconazole based products with physical or biologically compatability.

Aviator®235Xpro®, Ascra Xpro®, Chekker®, Eagle®, Fandango®, Firefly®155, Jaunt®, Liberator®, Proline®275, Sekator®, Variano® Xpro® are registered trademarks of Bayer.
