

# Tank-Mix Sheet

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer Crop Science gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

All the requirements or restrictions on other product labels must be adhered to when tank-mixing with Artist®. Contact Bayer Crop Science for full details.

Artist® is physically compatible with only one of the products or product mixes listed below at a minimum water volume of 200 L/ha and **with constant agitation of the sprayer tank during mixing, transportation and application only:**
