

The FluidLogic Active Hydration™ System for Motorcycles and Adventure Bikes

Take your adventure farther

Whether you're out enjoying the open road or adventuring on unpaved trails and backroads, there's no telling what you'll discover. It could be the new "must-see" spot of the season or a hidden gem waiting to be explored by the intrepid trailblazer. For that reason, it's important to have all the gear you need — including a way to stay hydrated on your journey. That's why we created the FluidLogic system for motorcycles and adventure bikes, so that you can perform better, react faster and stay fresher while you ride — no matter where adventure awaits.

Evolved from its initial motor sports racing application, the innovative active fluid delivery system keeps riders comfortably hydrated throughout long journeys. The FluidLogic solution has been adapted to easily mount to any motorcycle or adventure bike, empowering hydration equilibrium for riders who crave unique experiences.

BENEFITS

All-day Chilled Water

More Travel Space

Easy to Connect & Disconnect

FLUIDLOGIC FEATURES

Active Hydration™ — When you're adequately hydrated, studies show that it can have positive effects on your focus, blood pressure and other health factors, and can boost your performance by up to 10%.

Hydration Equilibrium — Achieving Hydration Equilibrium helps riders maintain their physical and mental acuity and decreases their recovery time, allowing users to continue along their journeys.

Easy To Install — The system can be attached to the side of the frame or secured inside a case attached to the back of the bike using a unique quick-release mount to free up much-needed space.

Quick Connection — Equipped with the MagLock connectors, the FluidLogic system connects via Flush360™ to a rider's helmet, assuring the fastest and most-reliable drip-free connection possible.

Robust & Lightweight Design — As durable as it is lightweight and compact, the 2.2-pound FluidLogic system is built to last — from the open highway to the Rocky Mountains and everywhere in between.

Customized Fluid Delivery Notifications — The hydration system keeps liquid cold all day long and delivers on-demand spritzes of perfectly chilled fluid, alerting users when it is time to drink via its unique microbutton.

Handlebar-Mounted Microbutton — The system's unique microbutton seamlessly mounts to your bike's steering mechanism without interference, eliminating the constant need to stop for water breaks.

ELEMENTS OF THE FLUIDLOGIC SYSTEM

1. THE POD

2. FLUSH 360™ HELMET CONNECTOR

3. MAGLOCK® CONNECTORS

4. AQUA COM®

5. MICROBUTTON

6. MOUNTING BRACKET

7. FLUID LINE

8. 32OZ OR 64OZ FLUID-CONTAINMENT BOTTLE

9. FLUIDLOGIC SMARTPHONE APP

HOW FLUIDLOGIC WORKS TO ACHIEVE ACTIVE HYDRATION:

1. Fluid is contained in a 32- or 64-ounce stainless-steel double-wall, vacuum-insulated fluid-containment bottle.
2. The bottle mounts securely to a motorcycle or adventure bike using a quick-release mount.
3. The bottle then attaches to a quarter-inch, dairy-grade insulated fluid line to keep fluid as cold as possible in transit.
4. The microbutton easily mounts to steering wheels, handlebars or dash areas, and its smartphone app-integrated LED reminds users when to hydrate.
5. The water-tight MagLock connection uses two concentric neodymium rare-earth magnets to deliver fluids to riders when they press the microbutton to take a drink.
6. The food-grade silicone mouthpiece ensures precise, drip-free fluid delivery wherever your adventure takes you.

COST

The FluidLogic System costs between **\$1,099.95** and **\$1,368.95**.
