

TELADOC HEALTH VANTAGE

Built for the operating room

A unique opportunity for surgical team training

Access to expert proctors, mentors, in-situ trainings and surgical broadcasts are all time-consuming and costly methods to learn new procedures.

The Vantage provides unique opportunities for surgical team training and sharing of advanced techniques. The Vantage uses secure internet broadband to transmit real-time audio/video, medical imaging, and patient informatics across the most reliable telehealth network to help students and surgeons learn new procedures remotely.

The purpose-built Vantage is a movable solution that is well suited for the operating theater, interventional lab, and hybrid procedure room.

 $\stackrel{}\longleftrightarrow$

Pan-tilt-zoom (PTZ) cameras on the Vantage head and extendable boom provide for comprehensive views of the surgical suite and operative field

Integrated I/O panel offers transmission of imaging studies, patient monitors, and informatics

Complete remote control and simultaneous viewing of I/O transmission sources for interactive collaboration

Multimedia tools for image capture, video recording, and live cursor/telestration

A cost-effective solution for procedure collaboration and telementoring

Industry-leading connectivity and 24/7 proactive monitoring to ensure successful telehealth connections¹

¹Monitoring and support are dependent on the support tier selected.
