

# Immediately connect to patients using real-time video

## Key benefits

- Simple user access
- Reliable, secure healthcare connections
- Connect with new or existing patients
- Support clinician-to-clinician or multi-party sessions

Clinicians require a simple and efficient process to connect to their patients. **The Quick Connect by Teladoc Health solution provides immediate and secure access to patients through a virtual care session.**

Designed to simplify virtual care delivery, Quick Connect does not require platform integrations and allows participants to access virtual care on any web-based device.

## A simple, easy-to-use solution

### Access

No patient registration or downloads required; use any web-based device to access care

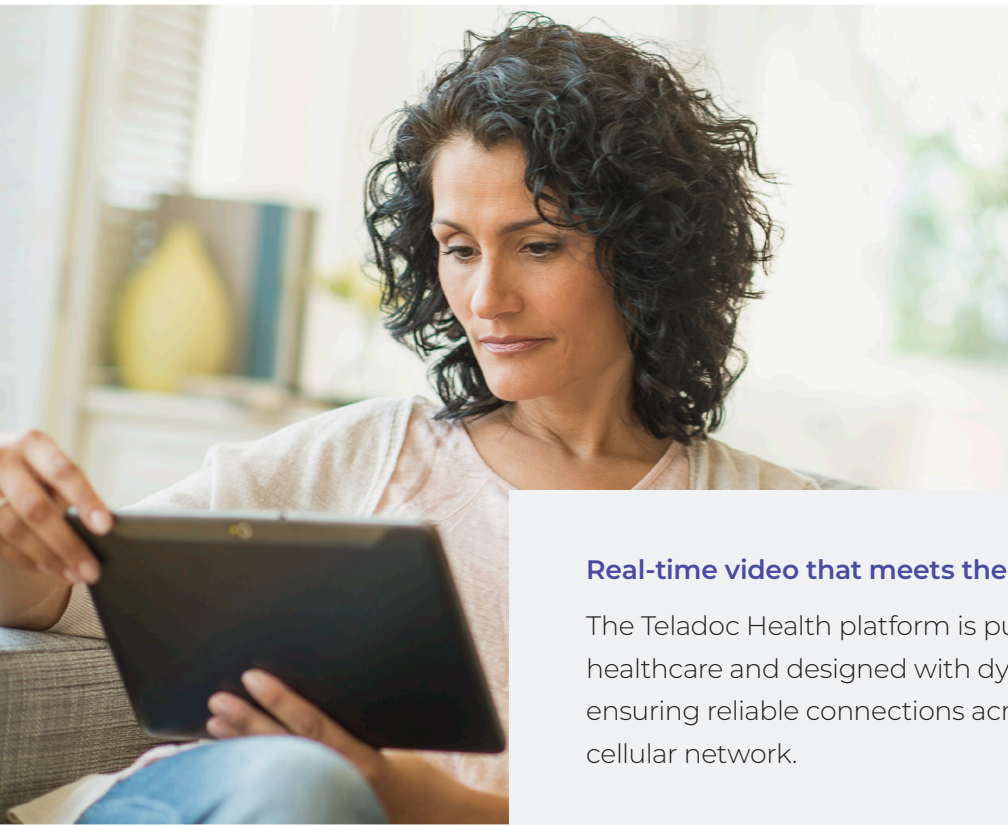

### Seamless

Use the link provided in the invitation to immediately access virtual sessions

### Secure

All participants receive a secure link to access a real-time healthcare visit

### Real-time video that meets the highest healthcare standards

The Teladoc Health platform is purpose-built for the rigors of healthcare and designed with dynamic bandwidth management, ensuring reliable connections across any consumer device and cellular network.

### Purpose-built for healthcare

- Industry-leading security standards
- HIPAA-compliant virtual care
- Optimized to reliably connect video sessions
- Ensure a secure patient experience with a unique link created for each virtual session
- Protect clinician contact information with platform-generated text messages and emails

### Seamlessly layer within existing workflows

#### Enable simplified access to care

Automated session invitations allow participants to use the link provided to immediately connect to a secure, reliable, real-time healthcare visit.

- No account registration required
- Single application download

#### Clinical documentation workflow

Avoid disrupting existing workflows by enabling clinicians to complete all clinical documentation within their existing EHR.

#### Patient follow-up

Clinicians have the option to schedule a patient follow-up or request an on-demand session with the patient to discuss a diagnosis or review lab results.\*

#### Multi-party sessions

Clinicians have the option to easily add consulting clinicians, family members or an interpreter at any point during the virtual session.

\*Scheduled sessions should follow existing scheduling workflows and note that the visit will be performed via Quick Connect.
