

We take enterprises from

zero to 100.

in *AI*.

IN MONTHS. NOT YEARS.

Not with another tool.

Not with another deck.

With an AI-native framework.

Three pillars. *One platform.*

THE FRAMEWORK

Three pillars.

*Syn*Wise Strategy

*Syn*Data Data

Enterprise Conversational Analytics

*Syn*Sights Business Intelligence

*Syn*Ops Operations Intelligence

In that order. None skippable.

P I L L A R I · S T A G E O N E

*Syn*Wise

Strategy & Advisory

Before a model gets built, we work out *what's worth building.*

This is where most AI work goes wrong.

P I L L A R I I · S T A G E T W O

*Syn*Data

The Data Foundation

Most enterprise data is *plentiful and unusable*.

We make it governed, connected, AI-ready.

*Syn*Sights

You don't read it. You talk to it.

Conversational analytics.

It *asks*. It *explains*. It *predicts*. It *recommends*.

SynOps

Where AI starts running the business.

AI stops being a project.

It moves into the workflow, *where decisions actually happen.*

THE ENGINE BENEATH

Lattice.

Our agentic AI platform.

The thing that turns three pillars into *one system*.
Not three products bolted together.

SynaptyX.

Three pillars. One platform.

The route from zero to 100.
