DELIVERING REAL BUSINESS IMPACT WITH GENAI

Drowning in claim verification whilst fraudulent claims slip through?

We are here to help. Find out how

The Problem

When manual processes become bottlenecks
and fraud risks

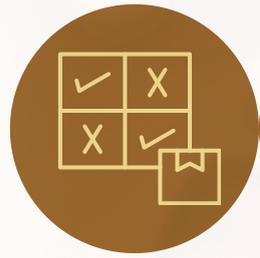

Manual verification created **delays** whilst validating claim documents

High fraud risk from manipulated transaction IDs, narrations, and mismatched records

End-to-end verification lacked automation, **driving up operational costs**

Finance teams spent hours cross-checking documents with **no guarantee of accuracy**

*Manual processes = costly delays + fraud
vulnerability*

Our Solution

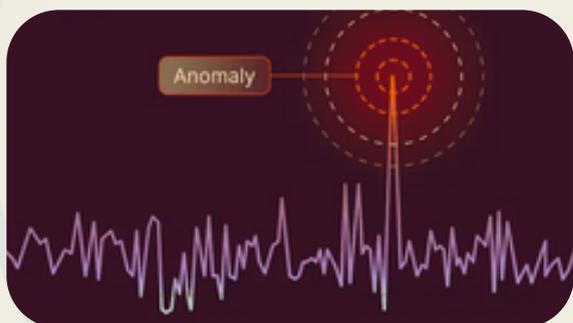

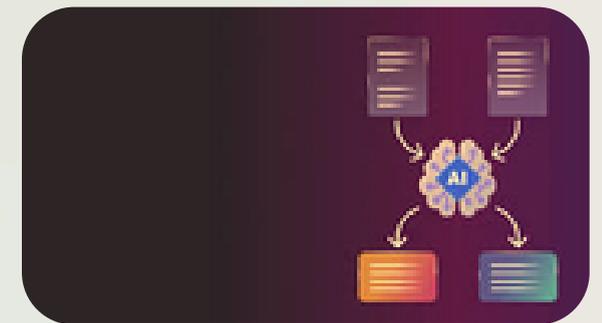

Intelligent automation built for real fraud detection

AI-powered Fraud Detection Agent

automatically compares ledger accounts, bank statements, and claim documents

Intelligent Matching & Validation highlights inconsistencies in narration or transaction amounts instantly

Anomaly Detection identifies records that may have been adjusted or manipulated

Agentic Workflow Automation creates a seamless pipeline from ingestion to reporting with automated stakeholder notifications
