

Legal Requirement Framework

Companies with the Société Cooperative - Genossenschaft - Società Cooperativa structure in Switzerland will need to have or adopt governing documents which include a commitment to a 'triple bottom line' approach to business to meet the legal requirement for B Corp Certification. In practice, for a typical business, this is likely to mean having an objects clause which states that it exists to promote the success of the business for the benefit of its shareholders, but also to strive for a material positive impact on the society and the environment.

The governing documents of B Corps will also need to state that the board members of the company need to consider a range of 'stakeholder interests'—including shareholders, employees, suppliers, society and the environment—when making decisions and, critically, that shareholder value is not the supreme consideration, but it is one factor amongst the many stakeholder interests which board members need to take into account when running the business.
