

Key Information Document on CFDs on Stocks

PURPOSE

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

PRODUCT

CFDs on stocks are offered by [Triton Capital Markets Ltd. holds an Investment Service Class 2 License and is regulated by the Malta Financial Services Authority \(MFSA\) of Notabile Road, Attard, Bkr3000, Malta MFSA IS/48817.](#)

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS A CFD?

A Contract for Difference (CFD) is a financial instrument that allows clients to speculate on the increases and decreases in the prices of the underlying assets.

CFDs are leveraged. Leverage trading requires a small amount of capital to be invested in order to open larger positions. Leverage trading requires extra caution, because whilst you can realize large profits if the price moves in your favor, you can also realize extensive losses if the price moves against you. When your remaining account equity falls below the margin requirement, failure to deposit additional funds may result in the position being auto-closed. The leverage varies with the product and it depends on the volatility and liquidity of the underlying asset. CFDs do not have pre-determined maturity date. At the end of the day any open positions are rolled over and charged a swap fee.

CFDs on Stocks

CFDs on stocks base their price on the price of the underlying stock price. Clients open a long position (buy) if they think the price of the asset will increase or a short position (sell) if they think that the price will fall. CFDs on Stocks are subject to dividend payments. When a dividend is paid on a stock, the value of the stock will drop and therefore short positions will be positively impacted by the drop in price, while long positions are negatively impacted. CFDs on Stocks are subject to the following trading hours: 9:30 AM EST- 4:00 PM EST.

CFDs on stocks have a leverage of 5:1

You may refer [here](#) to view all the stocks that the Company currently offers.

OBJECTIVES

This product is entered into for the purpose of speculation, capital growth or hedging. Clients do not own the underlying asset. CFDs are also highly customizable, which allows broker to offer products tailored to the client's needs, allowing lower minimum tradable sizes and lower minimum capital requirements.

INTENDED RETAIL INVESTOR

Trading in this product will not be appropriate for everyone. Only investors who understand how the prices of the product are derived, what is the margin and what is the financial leverage should choose this product. Investors must be aware of the investment risk; they can afford to lose; have a diversified investment and savings portfolio; have a high-risk tolerance; and have a good understanding of the impact of and risks associated with trading on margin.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money; do not invest money that you cannot afford to lose. Educate yourself on the risks associated with CFDs trading, and seek advice from an independent financial or tax advisor if you have any questions.

The Company has classified this product as 7 out of 7, which is the highest' risk class:

Be aware of currency risk: in case the stock is denominated in a currency different from the currency of your investments (base currency of the trading account), the final return is subject to the risk of exchange rate fluctuations between these currencies.

PERFORMANCE SCENARIOS

The scenario illustrated below shows you how your investment could perform, but it is not an exact indicator. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator.

CFD on Apple (held intraday) with leverage 1:5			
Opening price (either BID or ASK depending on the scenarios in table below)	P	\$	50.00
Trade size	TS	\$	1,000.00
Margin %	M		20%
Margin requirement (USD)	$MR = P * TS * M$	\$	10,000.00
Notional value of the trade (USD)	$TN = MR/M$	\$	50,000.00

Position opened as BUY (ASK price)			
Scenario	Price	Price variation	PNL
Favorable	\$ 50.80	1.57%	\$ 784.00
Moderate	\$ 50.20	0.40%	\$ 184.00
Unfavorable	\$ 49.50	-1.01%	\$ (516.00)
Stress	\$ 47.00	-6.38%	\$ (3,016.00)

Position opened as SELL (BID price)			
Scenario	Price	Price variation	PNL
Favorable	\$ 49.20	1.60%	\$ 784.00
Moderate	\$ 49.50	1.00%	\$ 484.00
Unfavorable	\$ 50.20	-0.40%	\$ (216.00)
Stress	\$ 53.00	-6.00%	\$ (3,016.00)

The figures shown include all the costs of the product itself. If you have been sold this product by someone else, or have a third party advising you about this product, these figures do not include any cost that you pay to them. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF FXDD IS UNABLE TO PAY OUT?

All client funds deposited with FXDD are 100% segregated from the company's funds. This segregation of funds ensures clients deposits cannot be used for any purpose other than client account trading. In addition, the Investor Compensation Scheme administrated by the Malta Financial Services Authority (MFSA), the Maltese regulator, provides limited protection for certain classes of investors. Triton Capital Markets Ltd. contributes to this scheme annually and in the event it becomes insolvent, its customer are afforded protection. FXDD's customers will be eligible for compensation of 90% of their investment up to a maximum limit of €20,000. Professional Clients or Eligible counter parties are not eligible for compensation as they fall out of the scope of the Investor Compensation Scheme, which was set up as a protection for retail customers.

WHAT ARE THE COSTS?

Company offers two types of accounts: a standard tier, commission-free account and the Premium tier, subject to commissions that are disclosed on our website. In addition, during the Premium tier registration, the clients are requested to sign a commission acknowledgment form, where the commission structure is explained.

- Spread: the difference between the buy price and sell price.
- Commission: \$16 commission (\$8 per trade) per lot.
- Rollover for Stock CFDs is the sum of "swap fee", "Dividend adjustments", and "Financial cost". Swap fees are charged every day a Client keeps the position open. Depending on the position held and the Company's prevailing interest rates, the Client account may be credited/debited

with the overnight cost; the daily debit/credit will be multiplied threefold for positions carried over Friday nights. The debit/credit will be charged/credited at 17:00 New York time for any position open at this time. You can close your position before 5PM EST to avoid the swap fee. Dividend adjustments take place when position passes 'Ex-dividend date'. You can close your position before 5PM EST one day before "Ex-dividend date" to avoid dividend adjustments.

The financing charge is calculated as follows:

$(P*Q*(IR + \text{Finance spread}))* (1/360)$. P = Price, Q = Number of contracts, IR = Interbank rate, Finance spread = 2.5% for short positions and 3% for long positions.

A floor applies to the relevant Interbank Rate, i.e. if the rate is negative it will be excluded from the financing calculation. If the calculated financing rate on a short position (Interbank Rate – Financial Cost) is negative, the financing credit will become a financing charge. USD.X has a finance charge of LIBOR +3%. You can close your position before 5PM EST to avoid the finance charge.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

CFD does not have any recommended holding period, and generally is used for short term trading. There is not any lock-up period, and the Investor can liquidate the trading position and monetize the financial result at any time during market hours.

HOW TO FILE A COMPLAINT

At FXDD our customers are our top priority. FXDD strives to ensure that all customer enquiries are dealt with promptly, effectively, and with the world-class customer service you have grown accustomed to. In the unlikely event you are dissatisfied with the service you were provided, you are welcome to contact a FXDD Compliance Officer at compliancemalta@fxdd.com.mt who will thoroughly look into your enquiry. An FXDD Compliance Officer will independently review your enquiry and will inform you of its outcome.

Although all enquiries are reviewed with an impartial view, we acknowledge that you may still be dissatisfied with its results. FXDD views client feedback as an opportunity to improve its products and services; therefore, if you feel so inclined, you may refer your feedback to the Office of the Arbiter <https://financialarbiter.org.mt/en/Pages/Home.aspx>.
