

Vee Workforce Insights Agent

## Embed smart AI insights with zero learning curve

[76% of HR leaders agree](#) they will be lagging in organizational success if they don't adopt and implement AI in the next 12 to 24 months.

AI puts the right insights into the hands of anybody—from executives to individual employees—using the simplest way to ask a question and get a response that they can understand and apply.

AI isn't your traditional technology stack. It is moving at warp speed with [many SaaS vendors pouring almost 60% of development resources into genAI initiatives](#).

Vee is your embedded shortcut to help your customers answer questions in plain language, without the overhead and risk associated with building on your own.

By applying AI to people insights and analytics, you can move beyond a simple "search & summarize" function with answers that actually make sense and help your customers make a real impact on their business. Innovate quickly, capture new competitive advantages, and command a premium for this capability inside your app.

“

**"Vee is one of the most spectacular examples of generative AI in HR today."**

**Josh Bersin,**  
Founder & CEO, The Josh Bersin Company

# Your fastest path to AI that sticks—trusted, proven, and ready to use

## Use our proven playbook with 2.1M users—and counting.

Accelerate your product innovation and embed the only people-focused AI solution directly into your product to deliver value faster and beat market expectations.

### Purpose-built AI for people data anyone can understand—with zero learning curve

From operational data from reports to deeper insights that users demand from analytics, exceed user expectations with intuitive, accurate insights. With **Vee**, your product can deliver actionable answers in plain language, no matter the user's expertise.

### Fast to embed, built to drive value—without costly surprises

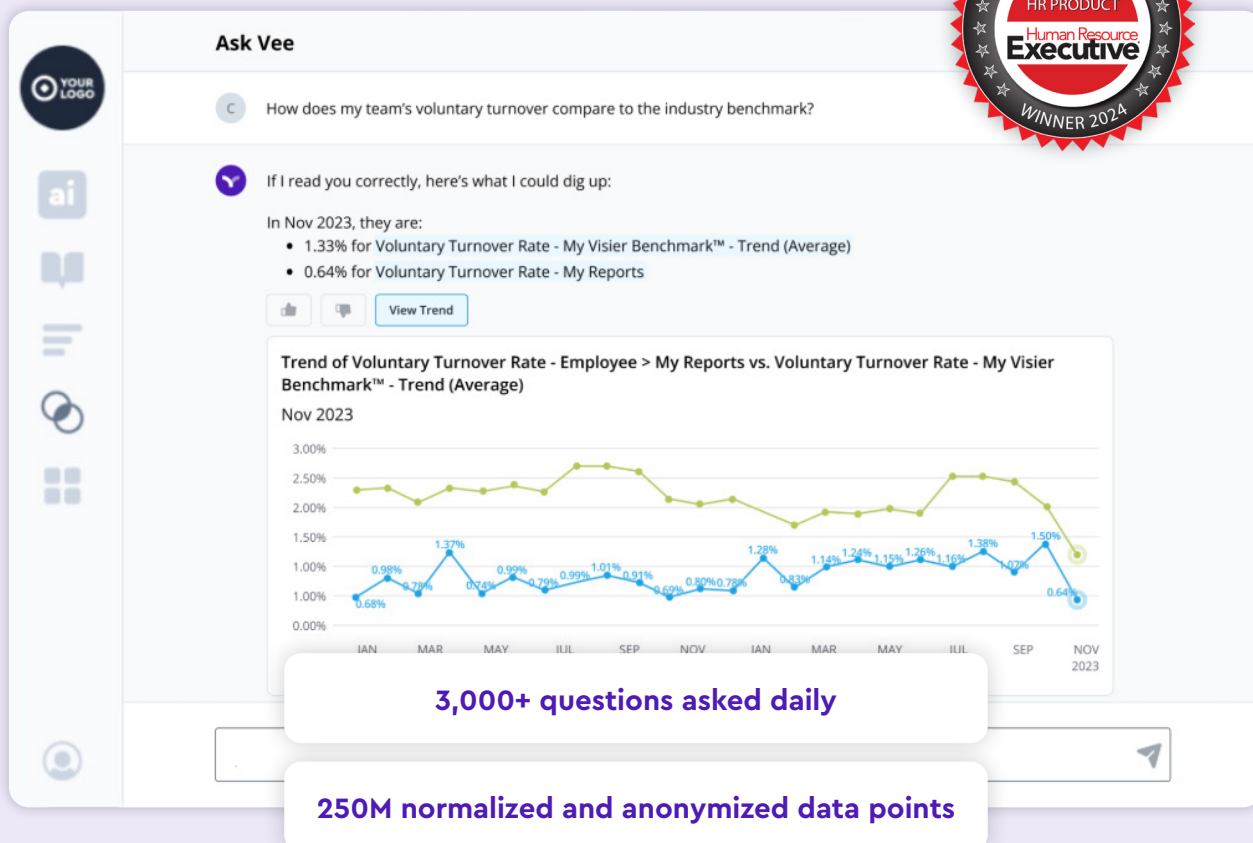

Differentiate your product with cutting-edge and award-winning AI already trusted by millions. Navigating the complexity of building genAI is costly and time-consuming. Skip the cost, risk, and upkeep of building your own LLM stack. **Vee for Partners** comes pretrained on 250M+ anonymized records and 4,000+ people metrics, ready for you to deploy.

### Secure, transparent, and always learning with your users at scale

**Vee** is continuously improving based on how people ask questions—so the answers get better over time. Built-in security and governance ensures insights are only seen by the right people, with role-based access embedded at the core. It clarifies ambiguous questions, respects context, and adapts to your customers' own terminology and logic.

### Add intelligence to your actions

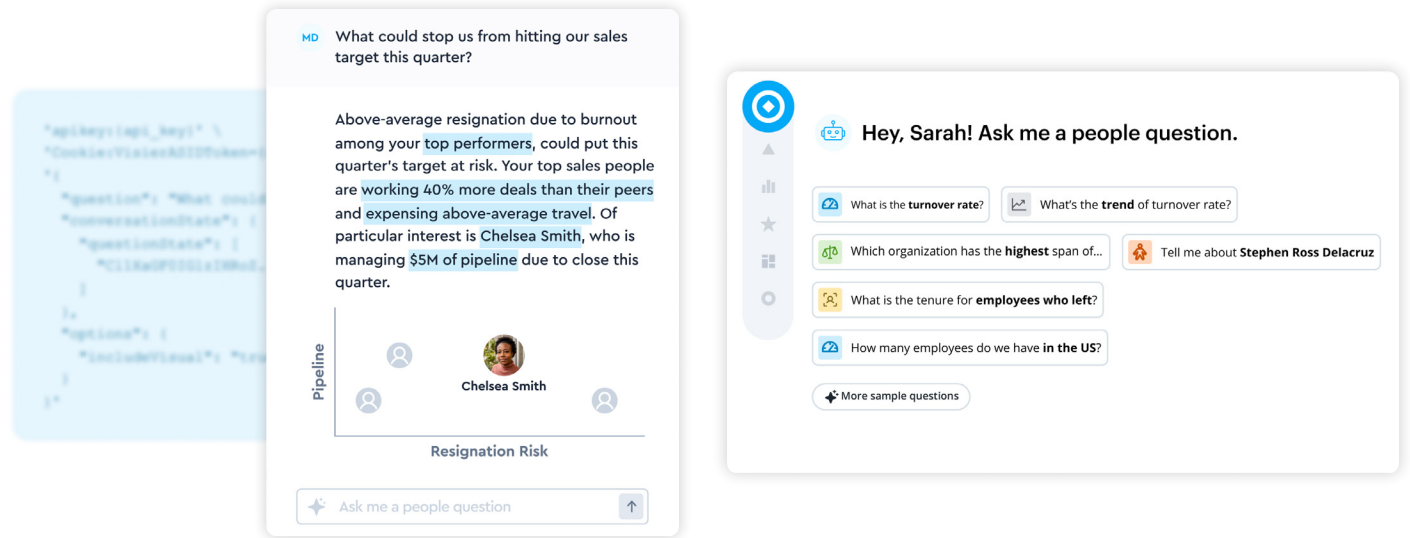

Vee connects to your AI to perform tasks within your application—ushering in a new era of workflow automation, customer delight, and differentiation. Partnering with Visier ensures you're at the bleeding edge of AI today and tomorrow, able to constantly deliver on customer expectations as time goes on.

## More ways than ever to embed

With different ways to embed, you can choose to embed into your existing chatbot to supercharge its ability to produce people insights or launch our conversational UI seamlessly in your product that allows your customers to ask questions naturally and deliver instant answers to their whole workforce in plain language, all based on their organization's data.

### Your interface, powered by Visier

Plug Visier into your AI agent or custom-built UI to elevate your experience. Leverage MCP agent-to-agent communication and APIs for easy integration

### Our interface, your brand

Quickly embed Visier's agentic AI experience, fully white-labeled and ready to use—right inside your product. Give users instant, explainable insights with minimal lift.

## What makes Vee so different?

### Purpose-built for people data

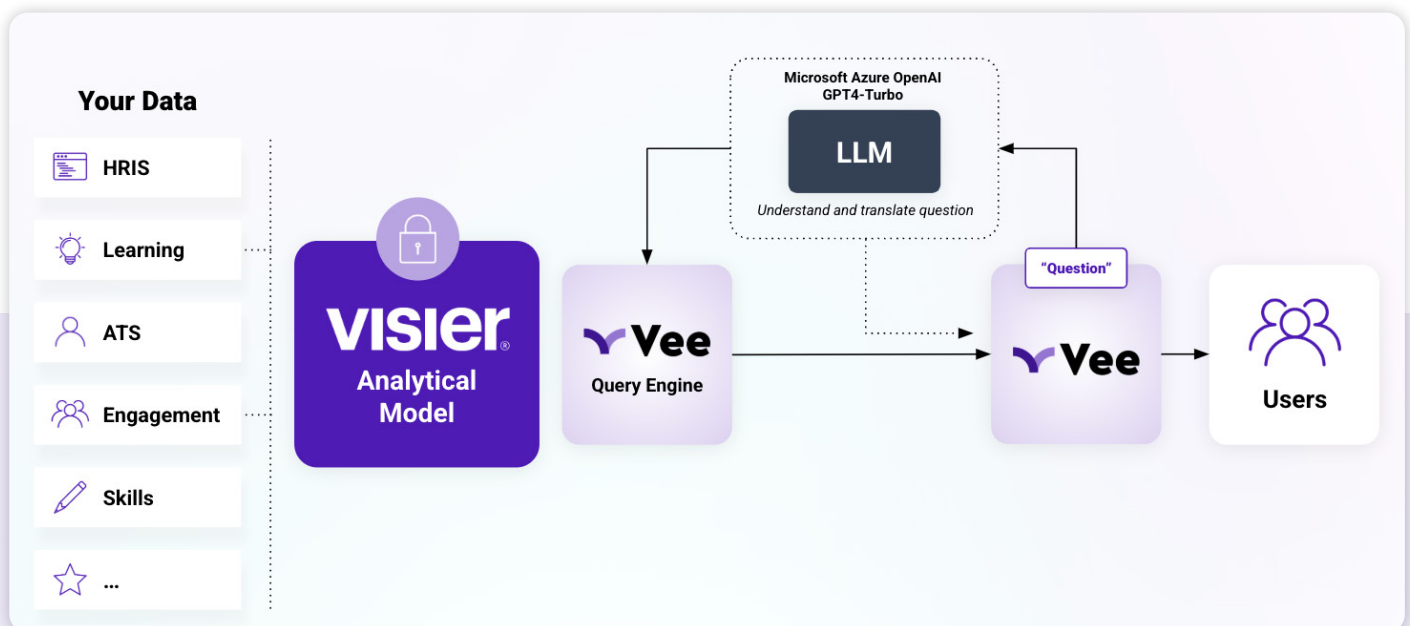

Only Visier has the purpose-built people data model, HR domain experience, and scale of HR data needed to draw accurate conclusions to nearly any workforce question. We use our massive body of anonymized data—not actual customer data—to train the LLM on how to translate a user's plain-language question into a Visier query against an organization's proprietary data. This includes over 250 million normalized, well-structured, anonymized data points, 4,000 business metrics, and tens of thousands of common people analytics questions.

When you build on Visier's platform, you are building on a platform that is secure enough for your analytics and reporting. The data that flows through the different areas are the same, whether you're asking a question through Vee or exploring your own charts in analytics.

## Natural language interface that continues to learn

Empower users to ask complex workforce questions in plain language and receive narrative answers they can immediately act on. **Vee's** technology offers unmatched performance, both in terms of accuracy of responses and processing speed.

Within seconds, it has the ability to understand natural questions, translate them into standard Visier queries against a structured data model, and return accurate answers that the user can actually understand, use, and confidently share with others in the business. We fine-tune the model around the types of questions people want to ask, and as a result, what contextual, accurate, and insightful answers look like.

## Unparalleled expertise and technology

Backed by Visier's years of experience in people analytics, **Vee** ensures your solution stays ahead of market trends and technological advancements and pairs well with other solutions like reporting and analytics for more ways to upsell and increase adoption for your customers.

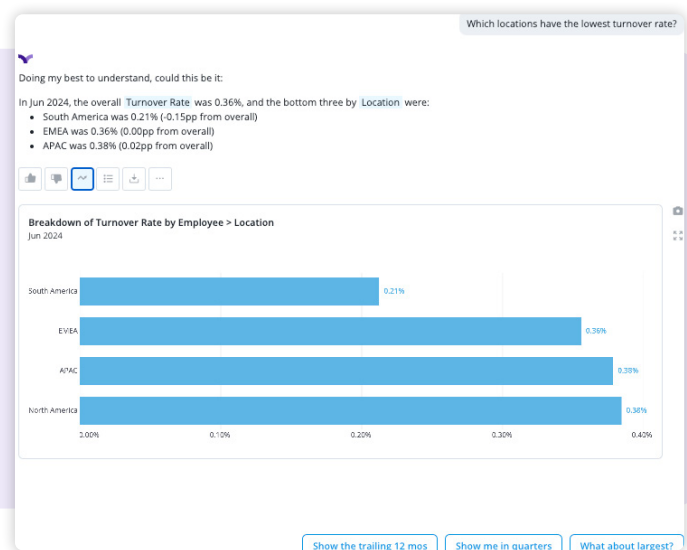

**Vee's** technology is built upon Visier's platform so it can deliver accurate, factual answers with our industry-leading security model to govern who can see the resulting answer. We ensure that the resulting insights get to the right people, at the right time, and with the right detail, with the ability to distinguish between the data access level of one user versus another.

Transform your product with **Vee**. Let's work to make your AI vision a reality in a matter of months.

"Our long-term partnership with Visier and early adopter feedback gave us the confidence to launch this to all of our analytics customers. Visier has proven their commitment to AI innovation, both in the security architecture they have developed over the past decade and their ethical approach to data collection and privacy."

**Ryan Bergstrom,**  
Chief Product and Technology Officer, Paycor

# About Visier Embedded

Visier Embedded empowers software companies to accelerate their development and go-to-market strategy with reporting, analytics, and generative AI solutions built for people and work data. By embedding Visier's award-winning solutions directly into their products, partners unlock new revenue streams, enhance user experience, and deliver actionable insights that delight their customers.

Visier's Embedded offerings are built on the Visier's Platform, which combines AI-driven reporting and analytics with a purpose-built data infrastructure, providing the scalability and flexibility to meet the complex data needs of people tech. This enables partners to bring sophisticated, ready-to-use analytics to market faster, reducing development costs while accelerating their ability to drive value for customers.

Since 2010, Visier has been the trusted partner for 70,000+ businesses worldwide, helping organizations unlock the power of data and win in their markets in 75 countries—including Paycor, Paychex, SmartRecruiters, Degreed, and more.
