[linkedin.com/in/audreyklammer](https://www.linkedin.com/in/audreyklammer) • Portfolio: [audreyklammer.com](https://audreyklammer.com)

Versatile front-end developer with user experience knowledge and design sensibility, drawing on years of experience successfully engaging with customers and collaborating on cross-functional teams.

## Skills

---

JavaScript, React, HTML, CSS, Sass, GraphQL, Node.js, Gatsby, Webpack, Git, Gitlab, ESLint, Stylelint, D3, Jest, Enzyme, TypeScript, Leaflet, Webflow, InVision, Adobe XD, Contentful, PostCSS, WordPress, Docker, Lighthouse

## Work Experience

---

### Freelance Front-End Developer — San Francisco, CA 2014–current

- Create websites, application templates, and application features for small businesses and startups
- Developed a login feature for a social media startup, Supergreat, using React, TypeScript, and Sass
- Designed and developed reusable templates for Simplur, a startup application targeting nonprofits

### Front-End Developer — Mindgruve, San Diego, CA 2021–2023

- Transformed Gatsby starter into clean, production-ready code using React, a headless CMS architecture, WordPress, Sass, CSS Modules, Adobe XD, GraphQL, and carefully selected APIs
- Created Procopio.com, a responsive, SEO-optimized website with multilingual capabilities, driving 46.5% more international traffic and 89.6% more organic traffic in the first year of launch

### Senior Product Engineer — Verizon Labs, Palo Alto, CA 2016–2019

- Principal front-end asset delivering customizations for the initial implementation of a big-data analytics platform in América Móvil's Brazilian market, earning \$8M in revenue in 2018 and a contract value of \$45M
- Developed a React-based geofencing app for the National Football League (NFL) in 2 months

### Coding TA — Bay Area Video Coalition, San Francisco, CA 2016

- Instructed underserved youth in coding and game design as part of the Game/Code/Design program

### Marketing Director & UX Developer — AlchemyAPI, Denver, CO 2012–2014

- Third employee at an NLP startup: positioned the CEO and company in 65 articles as a deep-learning thought-leader, resulting in an introduction to key IBM Watson executives who later acquired the company
- Transformed AlchemyAPI.com from HTML/CSS to Drupal in time for a Series A PR deadline, resulting in a savings of \$60,000, a mobile-friendly user experience, and a 300% increase in mobile traffic

## Education

---

Front Range Community College, Longmont, CO — Multimedia Certificate 2011

University of California, Santa Barbara, CA — Bachelor of Arts (BA) in Communication 2006
