## **Appendix 6**

### **First Tier Works Eligibility**

This appendix provides a list of residential premises that are eligible for First Tier Works as described under Part 5 of the Ninth Schedule of the Section 106 Agreement dated 9th July 2009.

There are a total of 1294 newly eligible residential premises. 155 are within the London Borough of Newham, 289 are within the Royal Borough of Greenwich and 850 are within the London Borough of Tower Hamlets.

Subject to the provisions of the Section 106 Agreement, the general scope of works will comprise:

- for single glazed properties secondary glazing and sound attenuating vents
- for double glazed properties sound attenuating vents only

The works will relate to habitable rooms that have windows on elevations most affected by aircraft noise as described in the Section 106 Agreement. The method of determining eligibility for First Tier Works is described below.

S106 requirement, Fourth Schedule, Part 2, Para 1 states that:

"In the preparation of each Annual Performance Report the Airport Companies shall determine First Tier Works Eligibility and Public Buildings First Tier Works Eligibility by applying the Eligibility Methodology and shall publish in each Annual Performance Report the boundary within which premises having First Tier Works Eligibility and Public Buildings First Tier Works Eligibility are situated together with the 1998 57 dB Contour, the Actual 57 dB Contour, the Predicted 57 dB Contour and the Predicted Reduced 57 dB Contour." This schedule of premises has been created using the following noise contours:

- Actual 2012 57 dB contour;
- Predicted 2013 57 dB contour;
- Predicted reduced 2013 57 dB contour

The full "Eligibility Methodology" is defined in the Ninth Schedule, Part 4, Para 2.

The detailed procedures for informing, obtaining permission and for carrying out the works to those properties that are eligible for First Tier Works are set out in the Section 106 Agreement (Ninth Schedule, Parts 5 and 6).

All owners and occupiers of properties identified as eligible for First Tier Works in this report are to be informed within 30 days that they are eligible under the scheme. Within 6 months of establishing eligibility, permission to undertake a survey to determine what treatment is required is sought from the owner and occupier (if different). Once permission is granted (and subject to rectification of any defects in existing windows, etc.), the works are carried out within a further 6 months.

A flow diagram indicating the order and time periods in which these procedures are undertaken is provided below.
