1.1 Pallet Freight pricing

Pallet Freight pricing is based on kilometres and chargeable weight. If other consignments can be loaded on top of the consignment, the highest of the following options is used as the chargeable weight:

- Actual weight = weight of the product itself + weight of packaging material
- Cubic weight 1 m³ = 333 kg

If no other consignments can be loaded on top of the consignment or it cannot be loaded on top of other consignments, the loading metre weight is used as the chargeable weight.

- Loading metre (ldm) 1 ldm = 1,850 kg (length x width / 2.4m)
 - o FIN-pallet = 0.5 ldm, EUR-pallet = 0.4 LDM

The freight price includes transport from the terminal to the recipient anywhere in Finland; pick-up price shown separately. The service always includes pick-up, and Pallet Freight consignments cannot be left for delivery at Matkahuolto locations. Any standard Matkahuolto parcel pick-up price does not cover the pick-up of Pallet Freight consignments.

The Pallet Freight fuel surcharge is reviewed weekly and takes effect on Mondays. The Pallet Freight fuel surcharge is based on the previous week's diesel price quotations plus, similarly to the fuel surcharge for parcel services, a separately determined share of the compensation for CO₂e emissions from transport and/or other emission reduction measures. The current fuel surcharge is available on Matkahuolto's website.

<https://www.matkahuolto.fi/corporate-customers/fuel-surcharge>

1.2 Surcharges

Matkahuolto has the right to add charges for additional services retrospectively for a consignment

- The surcharge for goods requiring special handling due to length or otherwise is charged according to length; not applicable for consignments under 40 kg.
 - o length 2.51-3.99 52,89 €
 - o length 4.00-5.99 76,40 €
 - o length 6.00-9.99 99,91 €
 - o length > 10 m 146,92 €
- BTOC Pallet Freight includes delivery to upper floors and a call before delivery, €46.53
