

Capabilities Statement

Introduction

Global Synthetics is a leading distributor and manufacturer of a wide range of geosynthetics to service the engineering, construction and building sectors throughout Australia, New Zealand and the South Pacific Islands region. We are staffed by personnel with a long history in engineering design and specifically, the use of appropriate geosynthetic products to provide value engineered, technically viable solutions to construction projects.

Global Synthetics have offices throughout New Zealand and Australia and dedicated agents and distributors located in the South Pacific Islands.

Trusted Quality

Global Synthetics have partnerships with some of the largest world manufacturers of geosynthetics. Our partner commitments are to use the highest quality raw materials, the latest in manufacturing techniques and to consistently monitor all aspects of quality control through all product processes.

Our manufacturing partners are committed to formal accreditation of their production, management and testing processes generally certified to ISO9001 standards

Our areas of product expertise include:

- **Pavement Stabilisation and Reinforcement**
- **Retaining Structures**
- **Ground Improvement**
- **Water Management**
- **Secure Containment Facilities for Landfills**
- **Erosion Control Coastal Protection**
- **Mechanically Stabilised Earth (MSE) Walls**
- **Corrugated/Structural Metal Plate culverts**

Materials

Global Synthetics use a range of polymers including polypropylene, polyester, polyethylene and aramid to ensure that the most durable polymer is used for performance in a range of environmental and service conditions. You are assured of the most advanced choice of materials when selecting a geosynthetic product supplied by us.

Distribution

Strategic warehouse locations and an excellent stock holding across our product range ensures that your projects are serviced quickly and efficiently. Our technical and sales staff have a passion in ensuring that all orders are processed quickly and efficiently. Our warehouse staff and transport team ensure that we deliver products to you in a timely and safe manner. Global Synthetics will co-ordinate large orders such that our customers are fully aware of all aspects of the delivery program and are able to ensure that site personnel can safely unload in the most efficient manner.

Environmental Sustainability

We acknowledge our responsibility as a supplier to raise awareness and understanding of environmental sustainability, reducing our environmental footprint and embedding a 'sustainability' culture in the workplace. We are committed to aligning ourselves with business partners who produce geosynthetic solutions without compromising the environment. Partners who implement sustainable manufacturing practices, reducing their carbon footprint, and developing products and systems that have lasting environmental benefits. Geosynthetic solutions have long contributed to working more sustainably in the construction industry.

Personnel

With experienced engineers and an excellent knowledge of the products, Global Synthetics staff can advise you on the best choice of product, construction advice, supporting literature and design assistance.

Training and Industry Association

Global Synthetics is committed to advancing the knowledge of our clients by offering training and support. Our dedication to this is evident through our goal of offering readily accessible product information and technical support. Global Synthetics provides additional educational opportunities to the industry with specific technical Seminars and Webinars on geosynthetic applications to contractors and designers on a regular basis. Our Industry Seminars feature international geosynthetic experts, latest design and construction details with relevant case studies applicable to our industry.

We support our industry by being members of a range of industry associations such as:

- **International Erosion Control Association (IECA)**
- **International Geosynthetics Society (IGS)**
- **Institute of Engineers Australia (IEAust)**
- **WMRR (Waste Management and Resource Recovery)**

Mission Statement

Global Synthetics mission is to provide technical excellence, industry leading knowledge and be the partner of choice across the APAC region, for infrastructure development requiring advanced, high quality geosynthetic solutions.

We are committed to bringing the latest innovation in geosynthetic products to every project and ensure we are committed to building a sustainable future for our client's, employees and generations to come.

Diversity & Inclusion

An inclusive workplace that embraces and celebrates diversity and inclusion is at the heart of the Global Synthetics' values and central to us becoming an employer of choice. We are committed to building a workforce that truly represents the communities in which we live and work. We believe that our commitment to diversity and inclusion creates a distinct advantage and will continue to build a more innovative, responsive & people focused organisation.

Our organisational culture thrives on mutual respect, teamwork and diversity of thought in the workplace among people who are diverse in work background, experience, education, age, gender, race, national origin, physical abilities, religious belief, sexual orientation, gender identity and other real or perceived differences.

At Global Synthetics we value diversity and inclusion and recognise the benefits that they bring to our company, customers and key stakeholders subsequently we are committed to building & maintaining an organisational culture and workplace that fosters diversity and inclusion across all levels of the business. This policy statement and supporting processes are aimed at creating a culture where our people understand that each individual is unique and that embracing diversity makes us more flexible, creative and competitive.

Our commitment to diversity and inclusion is strengthened through encouraging and recognising creativity, innovation and thought leadership and extends to all areas of our business, including recruitment, selection and appointment of roles, training and development, remuneration and reward, retention of employees, flexible working arrangements, succession planning and company policies and procedures.
