

NEW HERE? Check out a few best practices to help you get started...

We know that some of our kids have special needs or other learning challenges. We want to encourage you to create an inclusive experience, giving your kids with special or additional needs the opportunity to participate in the Preschool and Elementary Kit activities alongside their siblings and peers.

This Special Needs Kids Kit is available to you if you need supplemental materials and resources to support our Preschool and Elementary curriculum.

We know each child is unique, so feel free to adjust and use these resources in a way that is most beneficial to you and your kids!

SUGGESTED TEACHING SCHEDULE

- 1) **INTRODUCTION:** Tell your child what they will be learning about in one sentence. Show them the storyboard and point to the main character or idea. (1 minute)
- 2) **TEACH:** Watch the teaching video, even if your child is only able to engage for a few minutes. This will help introduce the story and set up the main idea you will be teaching. (5 minutes)
- 3) **RE-TELL:** Tell the Bible story using the visual storyboard. The images will help you tell the story in a simple way. Let your child point to images they want to learn more about. (2-3 minutes)
- 4) **MULTI-SENSORY MOMENTS:** Give your child the opportunity to engage in multi-sensory activities like the Unit Song and Coloring Page to help reinforce what they just learned. (5-10 minutes+)
- 5) **MEMORY VERSE:** Help your child memorize the same memory verse their siblings and peers are learning using the poster and song. Go over it once or twice together today at the end of your lesson time. Review it every day until you have it memorized! (2-3 minutes)
