# Welcome Colleagues!

## Dear Vantage Attendees:

On behalf of LAPP Corporation (Local Authorities Pension Plan) and Alberta Investment Management Corporation (AIMCo), we thank you for joining us, in person, for the first national public pension conference. This conference is intended to bring together public pension plan managers and Plan investment professionals from across Canada to review the challenges and key learnings of the past and share ideas on a future path to continued success and sustainability. Vantage is about coming together for a discussion of the future challenges that lie in wait.

The word "Vantage" can be defined as "a place or position affording a good view of something," and what better place to host a good view of the public pension landscape than in Banff, Alberta. Not only will you soak in Banff's breath-taking backdrop, but you'll traverse the peaks and valleys of the current and future financial landscape. Vantage's theme is: Building Value for Public Pensions. This theme will be addressed through many exceptional and enlightening sessions, and our incredible presenters will share their knowledge and expertise through various sessions that will keep you enlightened and informed. Here are some key sessions that we can't wait to share with you:

### KEYNOTE Speaker

**Mark Carney**

### FEATURED GUEST Speaker

**Marko Papic**, Partner and Chief Strategist (Clocktower Group)

### Canada's Pension Model: Reflections

**Keith Ambachtsheer**, President, KPA Advisory Services Ltd.

**Claude Lamoureux**, Former President & CEO, OTPP

It's also an exciting time for LAPP as it celebrates its 60th Anniversary and continues to adapt to the shifting pension landscape, along with all public plans in Canada. It is a great opportunity to celebrate this milestone with you.

Before closing, we would like to thank all delegates for attending Vantage and for bringing their expertise. As public pension leaders, we all have the vision and the knowledge to help build value for Canadians now and in the future. Throughout the two days of Vantage, we ask you to stay engaged, ask tough questions, and have fun connecting in person.

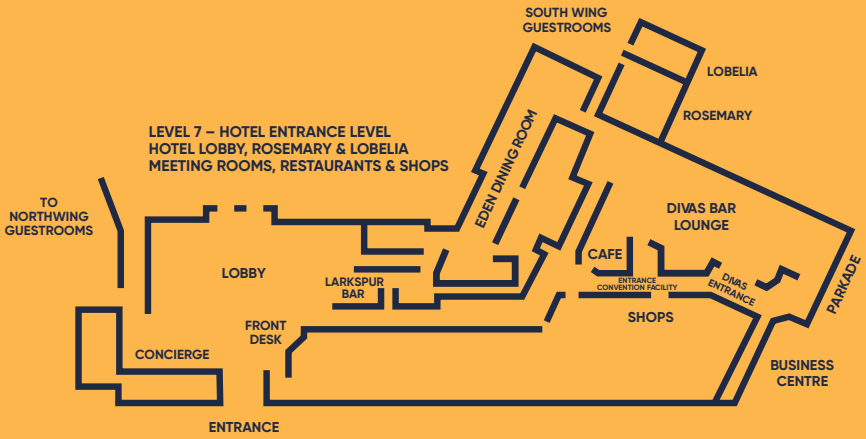

Sincerely,

**Chris Brown**, CEO, LAPP Corporation

**Evan Siddall**, CEO, AIMCo

## Canadian Pensions in a Global Context: From the Inside Looking Out and from the Outside Looking In

The 'Canadian Pension Model' has become the envy of the global pensions world. Yet, the Mercer CFA Institute Global Pension Index gives Canada only a 'B' rating for its retirement income system. This Panel discusses Canada's model in the context of other countries who could benefit from its adoption and explores some of the good practices elsewhere that could improve Canada's rating overall. What would it take for Canada to be an 'A' pensions country?

## Sustainability Reporting – A Path Forward or Pandora's Box?

In this presentation, Ed will explore some of the challenges and opportunities for pension plans being posed by the increasing focus on sustainability reporting for and by fiduciary asset managers. How might it change the paradigm for corporate governance, investment decision-making, board and trustee duties, and stakeholder accountability?

## Building Value for All

Former governor of the Bank of Canada and more recently the Bank of England, Mark Carney will present the featured keynote address with a message for Public Sector Pension Plans across Canada. Following the 2021 release of his book *Value(s) - Building a Better World for All*, Mark will share his views on restoring the balance between economic values and social values post COVID and in a time of significant political and economic volatility. Board members, trustees, and executives of Canada's public pension plans and investment managers will hear from one of Canada's most exceptional leaders on how to rethink and rebuild today's market society for the benefit of all, and what role Canada's public pension plans can play in that future.

## Geopolitical Alpha and Beta

Geopolitical analysis is no longer a nice-to-have. Multipolarity is a paradigm shift investors are only now becoming intimately aware of with increasing US-China tensions, the Ukraine war, deglobalization, and the overall increased probability of military conflict around the world. Even so, it is not sufficient to simply say that geopolitics will assert itself more forcefully over the next decade. Investors must navigate the new, complicated, chess board and generate alpha at the same time.
