

Daily Market Brief

Jun 12, 2025 (UTC -02:00)

Peter Chung | Head of Research
Min Jung | Research Analyst

BTC	\$108,661.21 -1.5%	S&P500	6,022.30 -0.3%	US 10Y	4.4150% -0.0578PPT	WTI	\$68.58 +5.5%
ETH	\$2,772.11 -1.5%	Nasdaq	19,615.88 -0.5%	DX	98.45 -0.7%	Gold	\$3,385.92 +1.3%

- Market slid as the U.S. session opened, with BTC giving up its \$110K mark. As of now, \$BTC is trading at \$108,661 and \$ETH at \$2,771, with Bitcoin dominance at 64.14%.
- U.S. CPI for May came in below expectations across the board—headline CPI rose 0.1% MoM (vs 0.2% expected) and 2.4% YoY (vs 2.5%), while core CPI rose 0.1% MoM (vs 0.3%) and 2.8% YoY (vs 2.9%). The softer inflation print has raised market expectations for a Fed rate cut in September (now at 59.7%). See below for more.
- A few other headlines include: GameStop plans a \$1.75 billion convertible senior notes private offering; payment company Stripe to acquire crypto wallet provider Privy; and the U.S. Senate voted 68–30 to invoke cloture on a substitute amendment to the GENIUS stablecoin bill.
- During the last 24 hours, the top three gainers were \$KAIA, \$A, and \$EOS, while the top three losers were \$GRASS, \$PENDLE, and \$AERO.

Benign May CPI Boosts Rate Cut Hopes

May's lower-than-expected CPI data is significant, as it represents the first full month after the April 2nd Liberation Day tariff announcement, providing insight into tariff impacts. While companies may raise prices in June or July, the benign May data suggests tariffs don't automatically drive inflation. The relationship between tariffs and inflation is complex, shaped by factors like substitution, supply-demand dynamics, competition, and pricing power. Bond markets rallied, with CME futures immediately reflecting higher expectations for rate cuts this year. An M2-driven risk asset rally very much remains a plausible scenario.
