Guggenheim Launches \$20M Digital Commercial Paper on Ethereum

Guggenheim Treasury Securities, a subsidiary of Guggenheim Capital, has made a significant move in the world of digital finance by issuing the first Digital Commercial Paper (DCP) on Ethereum. This \$20mm tokenised commercial paper, issued through Amp.Fi Digital, represents a growing trend of traditional finance giants embracing blockchain technology for real-world assets. The issuance received Moody's highest credit rating of P-1, highlighting its credibility in the financial sector.

This development follows the approval of spot Bitcoin ETFs earlier this year, which has fueled interest in blockchain-based digital assets among traditional finance institutions. The demand for tokenised assets is surging, with tokenised government securities like U.S. Treasury Bills reaching over \$2B in market capitalisation. Notable players like BlackRock and Franklin Templeton have also launched successful tokenised Treasury funds, with assets growing rapidly. The move by Guggenheim is part of a broader trend, with other major companies like Siemens AG and Visa also venturing into tokenisation on blockchain platforms. This shift towards tokenisation on Ethereum demonstrates the platform's growing recognition as a global settlement layer among institutional investors, potentially driving future demand for ETH.
