

# ADVANCED ARFF AVIATION INCIDENTS

---

## OVERVIEW:

Sign up for the Advanced ARFF Aviation Incidents course to master handling the critical first 20 minutes of any ARFF incident, regardless of airport size. This training covers managing initial strategic priorities and tactical-level operations, including search and rescue, interior and exterior operations, cargo operations, and hands-on response scenarios. You'll also get the chance to step into the incident commander role and practice making initial assignments for both minor and major ARFF incidents. Enhance your expertise and be prepared for any situation. Here's what you'll master:

- Search and rescue
- Interior and exterior operations
- Hose deployment into new large airframe aircraft
- Extensive hands-on training
- Various tactical considerations
- High-tech classroom tabletop operations
- Incident command system familiarization and practice

This course is designed to provide an enhanced level of training for certified ARFF personnel. The course is ideal for the experienced ARFF firefighter and aspiring or new ARFF Company Officer level individuals.
