Current Repair Garage guidelines:

1. Cleaning of parts shall be conducted in listed and approved parts-cleaning machines.
2. Drained waste liquids shall be stored in approved tanks or containers.
3. Crankcase draining and liquids shall be stored in approved tanks or containers until removed from the premises.
4. Self-closing metal cans shall be used for oily waste.
5. Sources of ignition shall not be located within 18 inches of the floor.
6. Smoking shall not be allowed in repair garages except in approved locations.
7. Building's having a basement or pit where flammable vapors could accumulate, the basement or pit shall be provided with mechanical ventilation.
8. Vehicle fuel system shall be inspected for integrity prior to being brought into the repair garage. The fuel shutoff valves shall be closed prior to repairing any portion of the vehicle fuel system.
9. Indoor locations shall be ventilated utilizing air supply inlets and exhaust outlets arranged to provide uniform air movement. Ventilation shall be by a continuous mechanical ventilation system. It shall shut down the fueling system in the event of failure of the ventilation system.

Exceptions:

- a. Mechanical ventilation systems that are interlocked with a gas detection.
- b. Mechanical ventilation systems in repair garages that are used only for repair of vehicles fueled by liquid fuels or odorized gases, such as CNG, where the ventilation system is electrically interlocked with the lighting circuit.
