Section 8: Obligations when Trading on the Market

Price Limit Procedure

Procedure for Rule 8.1.1

8.1.1 *In order to prevent the execution of Orders submitted to the Trading System which are at unrepresentative price levels or are the subject of manifest price errors, the Market is subject to price limits as prescribed in the Procedures (“Price Limits”). All Orders on the Market must be entered within those Price Limits.*

8.1. Calculation of Price Limits

8.1.1. The Price Limits for each Contract Month will be determined from time to time by NZX in the Individual Contract Specifications and notified to the Market. Price Limits for a Contract will be calculated for a Contract Month according to the previous Trading Day’s Daily Settlement Price as further specified in the Individual Contract Specification for that Contract. Price Limits may be adjusted to reflect market conditions with the objective of preventing the execution of any Orders submitted to the Trading System with manifest pricing errors and/or at unrepresentative price levels.

8.2. Orders to be within Price Limits

8.2.1. All Orders on the Market must be executed within Price Limits throughout the Trading Session and during Pre-Open Session State.

8.2.2. Any Orders submitted outside of these Price Limits in the relevant Contract Month will automatically be rejected by the Trading System.

8.2.3. In response to volatile or illiquid market conditions, NZX may, at its discretion, remove the restriction of the entry of Orders outside the prevailing Price Limits.

8.3. Calculation of Daily Settlement Prices

8.3.1. Subject to Procedure 8.3.3, within 5 minutes of the Close or, in the case of Options, within 60 minutes of the Close, a Provisional Daily Settlement Price (for Contracts whose settlement time is at the Close) shall be released to the Market by NZX.

8.3.2. Within 30 minutes of the Close or, in the case of Options, within 90 minutes of the Close, the Final Daily Settlement Price (for Contracts whose settlement time is at the Close) shall be released to the Market by NZX.

8.3.3. Where there is a major technical failure preventing timely calculation of either the Provisional Daily Settlement Price and/ or the Final Daily Settlement Price, NZX will release the Provisional Daily Settlement Price and/ or the Final Daily Settlement Price as soon as possible.

8.3.4. Subject to Procedure 8.6.2, the Provisional Daily Settlement Price and Final Daily Settlement Price (each a “**Settlement Price**”) shall be calculated in the manner specified below to ensure a fair reflection of the market for the relevant Contracts:

- (a) **for the S&P/NZX 20 Index Futures (Contract No. 5):** in accordance with the cost of carry method, where inputs into the method reflect Trading System information and other information relevant to market activity; or
- (b) **for Options on Equity Securities (Contract No. 7):** in accordance with the Cox-Ross-Rubenstein method, where inputs into the method reflect Trading System information and other information relevant to market activity; or
- (c) another manner as specified by NZX if, in NZX's opinion, the methodologies specified at 8.3.4(a) or (b) above will result in a Settlement Price that is not a fair reflection of the market for the relevant Contracts.

8.3.5. Where the calculation of the Provisional Daily Settlement Price or Final Daily Settlement Price results in a price which is not a whole tick, the rounding convention that will apply in respect of all methods of calculating the Provisional Daily Settlement Price or Final Daily Settlement Price will be in accordance with those set out in Part B of Appendix One to the Procedures.

Part B, Appendix
One

8.4. Exposure of Provisional Daily Settlement Price

8.4.1. NZX shall display the Provisional Daily Settlement Price at the Close for a minimum period of ten minutes after posting.

8.5. Amendment to Provisional Daily Settlement Price

8.5.1. Where a Provisional Daily Settlement Price is disputed by at least two Participants and where those objections are received within ten minutes of the publication of that Provisional Daily Settlement Price, NZX shall have the discretion to amend the Provisional Daily Settlement Price as it sees fit.

8.6. Amendment to Final Daily Settlement Price

8.6.1. The Final Daily Settlement Price will be transmitted to the Clearing House. If the Clearing House considers that the prices do not correctly reflect the value of Contracts in the terms of Contracts within the Market, NZX may amend the Final Daily Settlement Price in NZX's sole discretion as appropriate.

8.6.2. NZX will monitor Market activity throughout the Trading Day to ensure that the Final Daily Settlement Prices is a fair reflection of the Market. Where any Final Daily Settlement Price established by this Procedure will in NZX's opinion have the effect of creating a market that is not fair, efficient, orderly or transparent, NZX may in its sole discretion amend the Final Daily Settlement Price.

8.7. Manipulation of Provisional Daily Settlement Price or Final Daily Settlement Price

8.7.1. Where any Participant manipulates the Provisional Daily Settlement Price or Final Daily Settlement Price, NZX will regard this as a breach of Rule 4.3.

Position Limit Procedure

Procedures for Rule 8.1.2:

- 8.1.2 *No Participant or no group of Participants who, pursuant to an agreement or understanding (whether formal or informal) act in collaboration, may secure a dominant position in a Contract or Class of Contracts, which has the effect of creating unfair or misleading Trading conditions. To ensure market integrity NZX may determine the permitted maximum number of Open Positions that any Participant or Client may hold or control in the Contract by specifying the relevant position limits in the Individual Contract Specifications (the “**Position Limits**”). A Participant shall ensure that the Position Limits applicable to any Client or Participant in respect of any Contract are adhered to at all times and that any Procedures regarding Position Limits are complied with. In addition, Participants must comply with the reporting requirements relating to Open Positions as set out in the Procedures. NZX may share such reports with CHO when NZX considers that doing so is necessary or desirable to ensure the integrity, certainty or orderly functioning of the Settlement System or Clearing House.*

8.8. Firm Position Limits

- 8.8.1. Position Limits prescribed in Individual Contract Specifications should be considered by Participants as hard limits applicable to all Market users specified, unless a Participant has successfully applied to NZX for a waiver from the Position Limits in accordance with Procedure 14.1.

8.9. Reporting of Open Positions

- 8.9.1. NZX may establish reporting levels on the Open Positions held, by any Client or a Participant and may require daily (or other periodic) reports from Trading Participants on the amount of Open Positions held, by any Client or any Participant, which shall include such information as specified by NZX and be provided in accordance with the timeframes established by NZX. NZX shall be entitled to require reports even if the amount of Open Positions held is below the reporting levels prescribed by NZX from time to time, or where no Position Limits apply to a Contract.
- 8.9.2. A Participant shall report promptly to NZX any instance in which the Participant has reason to believe that itself, a Client, another Participant or a Clearing Participant has exceeded or is attempting to exceed (acting alone or in collaboration with others) any Positions Limits established pursuant to Procedure 8.8.1.

8.10. Inform Clients of applicability of Position Limits

- 8.10.1. It shall be the responsibility of each Participant that accepts instructions to place Orders to inform Clients of the application of Position Limits and not accept Orders from any Client if the Participant has reason to believe that the Client, acting alone or acting in collaboration, has exceeded or is attempting to exceed the Position Limits.

8.11. Adjustment of Position Limits

- 8.11.1. Position Limits will be set according to liquidity in the specified Contract and liquidity in the physical underlying market. NZX will reserve the right to review and subsequently adjust Position Limits as it deems necessary based on changing market conditions and related factors and to publish any such amendments to the Market on a timely basis.

 - (a) under a price/time priority method:
 - (i) Buy Orders at the highest price and Sell Orders at the lowest price will have priority over other Orders in that same Contract and month; and

Rule Definitions for this Procedure

Block Trade means a transaction arising between Trading Participants in Contracts through the use of the Block Trade Facility, that has been effected outside of the Trading System.

Block Trade Order means an Order that utilizes the Block Trade Facility.

Block Trade Facility means the common trading facility as specified by the Procedures to allow the bulk sale or purchase of Contracts.

Exchange for Physicals Facility or **EPF Facility** has the meaning given to that term in the Procedures.

EPF Facility Trade means a transaction arising between Trading Participants through the use of the EPF Facility that has been effected outside of the Trading System.

Exchange for Swaps Facility or **EFS Facility** has the meaning given to that term in the Procedures.

9.1. Block Trading Facility and Block Trade Orders

9.1.1. The Block Trading Facility is a mechanism available for Block Trade Contracts. This facility allows Participants to arrange and execute large transactions via a facility that is separate from NZX Central.

9.1.2. Where a Trading Participant or an Advising Participant has received written authorisation from a Client in respect of a Block Trade Contract that the Clients' Order may be dealt with as a Block Trade Order, the Trading Participant or Advising Participant may utilise the Block Trade Facility in respect of that Order. A Block Trade will not occur unless it has been approved by NZX in accordance with Procedure 9.1.14.

- 9.1.3. Block Trades may only be executed during the Open (Normal) Session State specified for each Block Trade Contract in its Contract Specification, and for the period up until 10 minutes after the Pre-Close (such that transactions utilising the Block Trade Facility which have been organised just prior to the Pre-Close, may be submitted using the Block Trading Facility), subject to meeting the normal Block Trade Order reporting requirements as per Procedure 9.1.10.
- 9.1.4. For clarification, on the Block Trade Contract's Last Trading Day the Block Trading Facility will not be available after the Close.
- 9.1.5. A Block Trade is not executed until it is approved by NZX. An agreement between parties to execute a transaction via the Block Trade Facility does not constitute a 'filled' Trade.
- 9.1.6. All Block Trades are subject to Minimum Volume Thresholds specified for each Block Trade Contract in Part C of Appendix One to the Procedures.
- 9.1.7. The Minimum Volume Thresholds will apply to each leg of the Trade when a Block Trade comprising Contracts of two or more different delivery/ expiry months and/ or exercise prices is executed..
- 9.1.8. A Trading Participant executing a Block Trade must ensure it represents a fair value for that Trade. On each occasion of quoting a price for the transaction to be effected via the Block Trade Facility, the Participant, must, at the time, make it clear to the potential counterparty(ies), whether a Participant, a Client or otherwise, that the price being quoted is a price for a Block Trade.
- 9.1.9. Participants must not aggregate separate Block Trade Orders in order to meet the Minimum Volume Threshold on either or both sides of a Block Trade.
- 9.1.10. The Participant (or where there are two Participants, the reporting Participant agreed by mutual consent) must ensure that all transactions to be executed using the Block Trade Facility are reported electronically via the Trading System, within 10 minutes of verbal agreement of the terms of the transaction (or within 15 minutes in the case of Exceptional Market Circumstances or where the transaction to be executed via the Block Trade Facility is dependent on the execution of a transaction in another instrument), advising of:
- (a) the Block Trade Contract identifying code (including Contract Month);
 - (b) the price agreed upon (including the exercise price(s) if relevant, and the price of each leg of the Trade);
 - (c) the quantity of Block Trade Contracts (and quantified for each leg of the Trade, where applicable);
 - (d) firm reference;

- (e) account;
 - (f) Settlement Date (as defined in the Contract Terms and Administrative Procedures for the Contract);

 - (i) reporting party Clearing Participant;
 - (j) counterparty Trading Participant;
 - (k) counterparty Dealer name;
 - (l) counterparty Clearing Participant; and
 - (m) deal date and time.
- 9.1.11. Participants must not delay submission of a transaction to be executed via the Block Trade Facility.
- 9.1.12. The time limit for the submission of a transaction that is to be executed via the Block Trade Facility commences as soon as verbal agreement to the terms of the transaction is reached between the parties.
- 9.1.13. All written authorisations obtained by a Trading Participant from a Client, permitting the execution of an Order in respect of a Block Trade Contract as a Block Trade Order must include acknowledgement that:
- (a) Block Trades will be reported to the Market distinctly;
 - (b) the price at which the Block Trade Order is executed will not be used in establishing Daily Settlement Prices; and
 - (c) the price quoted for the Block Trade may or may not be the prevailing market price.
- 9.1.14. NZX will check the validity of the details of the transaction submitted by a Participant through the Block Trade Facility and approve the transaction for execution as a Block Trade once NZX is satisfied that the transaction meets the criteria specified in these Procedures.
- 9.1.15. Once the Block Trade has been executed, NZX will publish details of the Block Trade to the market (including Commodity, Security or other financial instrument, quantity, time, expiry months and the price).
- 9.1.16. NZX has the right to request the Participant executing the Block Trade to produce satisfactory evidence that the Block Trade has been organised in accordance with the Rules and Procedures.

9.2. Exchange for Physical Facility (EFP) and Exchange for Swap Facility (EFS)

9.2.1. NZX provides facilities, which allows Participants to organise and execute, subject to these Procedures, transactions that directly relate to a physical Commodity, Security, instrument or other transaction ("**Exchange for Physical Facility**" or "**EFP Facility**") or over the counter ("**OTC**") swap ("**Exchange for Swap Facility**" or "**EFS Facility**").

The **EFP Facility** specifically allows for the simultaneous exchange of a futures position in a Contract for a corresponding position in the assets (Securities or Commodities) underlying the Contract, or money, at a price privately negotiated between the counterparties.

The **EFS Facility** specifically allows for the simultaneous exchange of a futures position in a Contract for a corresponding OTC swap at a price privately negotiated between the counterparties.

9.2.2. An Individual Contract Specification will state whether an EFP Facility or EFS Facility is available in relation to that Contract.

9.2.3. An EFP Facility Trade or an EFS Facility Trade may only be executed during the Open (Normal) Session State specified for a Contract (for which those facilities are available), and for the period up until 10 minutes after the Pre-Close (such that transactions utilizing the EFP Facility or EFS Facility which have been organized just prior to the Pre-Close, may be submitted using those Facility), subject to meeting the reporting requirements set out in Procedure 9.2.12.

9.2.4. On the Last Trading Day an EFP Facility and/or EFS Facility will continue to be available until the close of NZX Central in relation to the expiring Contract, for which such facilities are available.

9.2.5. An EFP Trade or an EFS Trade is not executed until it is approved by NZX. An agreement between parties to execute a transaction via the EFP Facility or EFS Facility does not constitute a 'filled' trade.

9.2.6. No EFP Trade or EFS Trade may be effected:

- (a) where the parties to each side of the transaction are the same or acting on behalf of the same Person;
- (b) where both sides of the trade are taken out by the Participant on its own account or are taken out on behalf of the same Client; and/or
- (c) to execute roll business.

9.2.7. There are no limits on the type of underlying (Securities or Commodity) or OTC swap (excluding exchange traded futures or options on futures Contracts) that may be exchanged for a Contract via an EFP Facility or EFS Facility, however it must be of similar value or quantity to the Contract being traded and be reasonably correlated with that Contract. The responsibility lies with the Participant to provide all relevant information about the physical product to demonstrate that the Contract is of similar quantity or amount.

- 9.2.8. The time limit for submission of a transaction to be executed via the EFP Facility or EFS Facility that is set out in Procedure 9.2.12 commences as soon as verbal agreement of the terms of the transaction is reached between the parties. Participants must not delay submission of a transaction to be executed via the EFP Facility or EFS Facility.
- 9.2.9. All EFP Trades and EFS Trades are subject to Minimum Volume Thresholds specified for each Contract (for which such facilities are available) in Part C of Appendix One to the Procedures.
- 9.2.10. There are no restrictions regarding the price for Contracts Traded via an EFP Facility or an EFS Facility. However if the price of the Contract was substantially different from the current market price NZX would seek good reason as to why the parties wish to trade at this price. Procedure 9.2.5 requires NZX's approval for an EFP Trade and an EFS Trade.
- 9.2.11. NZX may require Participants to supply evidence of the underlying physical or swap transaction either prior to or following execution of the EFP Trade or EFS Trade and may refuse to approve an EFP Trade or EFS Trade in its sole and final discretion.
- 9.2.12. The Participant (or where the EFP Trade or EFS Trade has been organised between two Participants, the reporting participant is agreed by mutual consent) must ensure that all EFP Trades and EFS Trades are submitted electronically via the Trading System within 10 minutes of verbal agreement of the terms of an EFP or EFS (or within 15 minutes in the case of Exceptional Market Circumstances or an EFP Facility or EFS Facility that is dependent on the execution of a transaction in another instrument), advising of:
- (a) the Contract identifying code (including Contract Month);
 - (b) the price agreed upon (including the exercise price(s) if relevant, and the price of each leg of the Trade);
 - (c) the quantity of contracts (and quantities for each leg of the Trade where applicable);
 - (d) firm reference;
 - (e) account;
 - (f) Settlement Date (as defined in the Contract Terms and Administrative Procedures for the Contract);
 - (g) reporting party Trading Participant (company ID);
 - (h) reporting party Dealer name (trader ID);
 - (i) reporting party Clearing Participant;
 - (j) counterparty Trading Participant;

- (k) counterparty Dealer name;

Appendix Two: Form of Client Risk Disclosure Statement

Procedure
8.3.4

All Participants must, prior to accepting a prospective Client, provide that prospective Client with a Client Risk Disclosure Statement which contains, as a minimum, the provisions outlined in this Appendix Two:

To: _____
[Participant]

From: _____
[Client]

Date: _____

The Client acknowledges that:

1. The Client has appointed the Participant for the purpose of Dealing in [Contracts/Derivatives Contracts] in accordance with the terms of this Client Risk Disclosure Statement and the terms of the Client Agreement.
2. The Participant is regulated in the conduct of its dealings in Contracts Traded on the Market by NZX in accordance with the Rules and the Procedures. In relation to Derivatives Contracts traded on a F&O Exchange or Off-Exchange, the Participant is only regulated by NZX to the extent the Participant provides advice to and/or accepts funds from the Client in respect of Derivatives Contracts.

RISK DISCLOSURE STATEMENT

The risk of loss in trading in [Contracts/Derivatives Contracts] can be substantial. You should therefore carefully consider whether that kind of trading is appropriate for you in the light of your financial circumstances. In deciding whether or not you will become involved in that kind of trading, you should be aware of the following matters:

- (a) you could sustain a total loss of the Initial Margin that you deposit with a Participant to establish or maintain a position [*on the Market, on a F&O Exchange or on a Derivatives Contract traded Off-Exchange*];
- (b) if the market price moves against your position, you may be required, at short notice, to deposit with your Participant additional margin funds in order to maintain your position. Those additional funds may be substantial. If you fail to provide those additional funds within the required time, your position may be liquidated at a loss and in that event you will be liable for any shortfall in your account resulting from that failure;

- (c) under certain conditions, it could become difficult or impossible for you to liquidate a position (this can, for example, happen when there is a significant change in prices over a short period);
- (d) the placing of contingent orders (such as a "stop-loss" or "stop-price" order) may not always limit your losses to the amounts that you may want. Conditions may make it impossible to execute such orders;
- (e) a "spread" position is not necessarily less risky than simply "long" or "short" position;
- (f) the high degree of leverage that is obtainable in trading [*Contracts/Derivatives Contracts*], because of small margin requirements, can work against you as well as for you. The use of leverage can lead to large losses as well as large gains; and
- (g) if you propose to trade in options, the maximum loss in buying an option is the amount of the premium, but the risks in selling an option are the same as in other [*Contracts/Derivatives Contracts*]; and
- (h) [*NB: If a Risk Warning applies to a Contract, the relevant wording from the Contract Specification should be included.*]

This statement does not disclose all of the risks and other significant aspects involved in [*Trading Contracts on the Market or trading on a F&O Exchange or Off-Exchange*]. You should therefore study trading in [*Contracts/Derivatives Contracts*] carefully before becoming involved in it.

Specify here:

- (a) Full names(s) of the prospective Clients(s) (please print):
