When is the discount applied and how long does it last?

If I am not eligible this year, will I be able to apply next time?

For existing customers, if you do not meet the eligibility criteria this year, you may apply again later so long as we continue to offer TAL Health Sense Plus.

What are preventative screening tests for?

Preventative screening tests can help with the prevention of illness, the early detection of specific disease, and the promotion and maintenance of health. For example:

- Early detection of cancers can significantly improve your ability to recover.
- Understanding your blood pressure and cholesterol can help to manage your risk of heart disease and stroke.

Your GP can give you appropriate advice on how you can better manage your health with preventative screening tests.

Which preventative screening test must I take?

Eligible preventative screening tests are listed in your offer email. These tests align to the Royal College of General Practitioners' Red Book. You should discuss with your GP which test is appropriate.

If my GP recommends another test which is not on the list, will this be acceptable?

Yes, as long as the purpose of the test is preventative screening.

How much will the preventative health screening test cost?

Many preventative tests are covered by Medicare, but some will incur a fee. Speak to your GP to make sure you know what's involved. Please note, TAL will not fund the cost of any preventative health screening test.
