

Tech Tools Overview: Outcomes-Driven Work-Based Learning

NAF's Outcomes-Driven Work-Based Learning (ODWBL) model features a student-centered focus on identifying career aspirations, building Future Ready Skills, and developing meaningful professional connections. Collecting data on work-based learning (WBL) is an essential part of being able to measure impact and assess equity. NAF has developed a suite of tools to help districts and educators plan and implement impactful, equitable work-based learning and easily share outcomes with all stakeholders.

WBL Participation Tracker and Reflection Form

The WBL Participation Tracker logs work-based learning activities and records student participation, while the WBL Reflection Form captures students' perceptions of each activity's impact.

Skills Feedback Survey and Future Ready Skills Assessment

The Skills Feedback Survey and the Future Ready Skills Assessment allow industry professionals a user-friendly way to give formalized feedback to students on the development of their future ready skills.

NAFTrack Students

NAFTrack Students enables students to track their participation in work-based learning and reflect on their growth over time in the areas of aspirations, skills, and connections.

BENEFITS

Using NAF's tools to track work-based learning is easy to do, and the reports can be used to guide conversation and planning to make sure all students are participating in these meaningful activities.

- ✓ Identify **individual student participation**
- ✓ Identify and address any inequities in WBL
- ✓ Involve key stakeholders in planning
- ✓ Identify student impact of WBL activities
- ✓ Include **student voice** in planning WBL activities
- ✓ Improve quality & impact of WBL
- ✓ Provide students with feedback about their skill development
- ✓ Allow students to **track individual journey** towards aspirations, skills, and connections
- ✓ Provide access to resources that support student's path forward

Tech Tools Overview: Outcomes-Driven Work-Based Learning

FEATURES

The tools work in tandem to provide schools with a holistic view of student-level participation in work-based learning and the impact it is having on students. Each tool has its own unique features and together the data feeds into multiple dashboards.

WBL Participation Tracker

Contributor: Educators

- Enter and track WBL activities in one location.
- Collaborate and track WBL activities across multiple academies.
- Assign students to activities.
- Track the organizations and volunteers for each activity.

WBL Reflection Form

Contributor: Students

- Link directly to WBL activity.
- Capture student feedback after each WBL activity.
- Show quantitative and qualitative data on students' perspectives of WBL activities.

WBL Skills Feedback Survey

Contributor: Industry-Partner

- Link directly to WBL activity and student.
- Capture a student's skill level.
- Quick feedback from an industry professional.
- No log-in required for partners.
- Access via link or QR Code directly from a mobile device.

Data Dashboard

Audience: Educators

- View results all in one place.
- Evaluate equity in participation.
- Download data to use in planning meetings.
- Use to aid Perkins reporting and other funding opportunities.
- Access by various school level stakeholders.

Future Ready Skills Assessment

Contributor: Industry-Partner

- Link directly to WBL activity and student.
- Capture a student's skill level.
- In-depth feedback from an industry professional after an internship, clinical experience, mentored industry project, or apprenticeship.

NAFTrack

STUDENTS

NAFTrack Students

Contributor: Students

- Set goals for career aspirations and college plans.
- Review participation in WBL activities.
- Complete Reflection Forms.
- Track professional connections.
- Monitor skill development.
- Review feedback from industry partners.
- Self-check into a WBL activity.
