# Teaching CS Discoveries

## Module 4: Teaching and learning CS Discoveries

In this module, you will be introduced to authentic CS practices that students will engage with throughout the CS Discoveries course. These practices include debugging, using resources, and pair programming. You will also explore the role of the teacher within a CS Discoveries classroom and make a plan for how you will support student learning while teaching the course.

You will:

- Consider the role of the teacher in a CS Discoveries classroom.
- Learn about authentic CS practices that students will develop throughout the CS Discoveries course.
- Make a plan for how you will support student learning through differentiation, ongoing assessment, and promoting a culture of inclusion.

Suggested Time: 50 minutes
