Teaching CS Discoveries

Module 3: Overview of CS Discoveries

This module will provide you with an overview of the CS Discoveries course with an emphasis on concepts students will learn and tools students will use throughout the course. Engaging in this module will help you to make decisions about how to select the course content that you will implement in your classroom.

You will:

- Gain a high-level understanding of the CS Discoveries curriculum.
- Become familiar with the programming environments used within CS Discoveries.
- Decide which units of CS Discoveries you will teach in your class.

Suggested time: 60 minutes
