Enablement with YOUR data in the pipeline!

In our Celonis bootcamp, we provide participants with a dual approach for becoming rapidly upskilled in not only understanding how to use the Celonis, but to also apply the lessons directly to their own data!

Best when

- You want to go 'live' with an operational solution (e.g. business app) that has a 'human in the loop' function requiring users to interact with the Celonis platform directly and take action on an hourly to weekly basis
- You have completed a core implementation and are looking to quickly upskill your CoE.
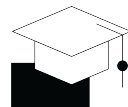

Audience:

- Process experts/analysts

Prerequisites:

- Existing data model built and validated
- Use cases were gathered/ideated beforehand
- Training materials customized to customer-specific environment
- Customer completed basic online Academy training in preparation

Duration:
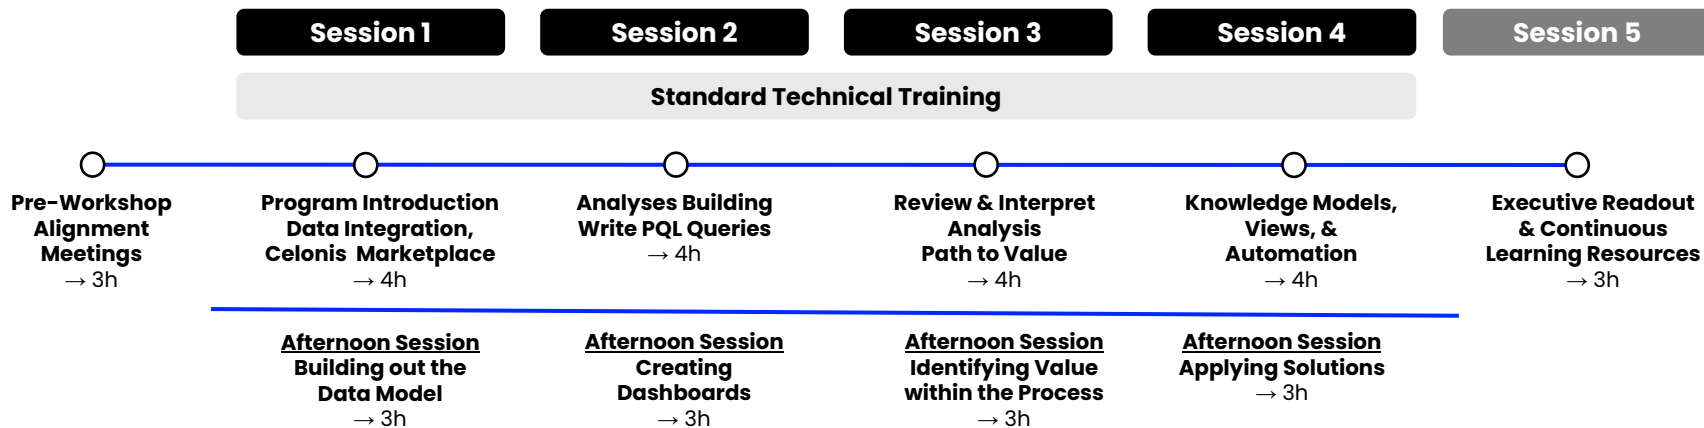

- 22.5-25.5 hours

Celonis Resources

- Consultant(s) – responsible for providing hands on support to customers during afternoon sessions
- Trainer – responsible for leading guided training in the morning sessions
- Value Engineer – provide platform and vision overview

Bootcamp Enablement - Layout

Format:

- Day 1: Review of Celonis and implementation to date
- Day 2 – 4: Morning consists of deep dive training on varied topics. Afternoon is applying the topic to their target use case
- Day 5 (half day): Customer report out on discoveries and insights and feedback on working with Celonis
- We recommend a full week, but sessions can also be split out into several weeks if required

Session 1	**Session 2**	**Session 3**	**Session 4**	**Session 5**
