

Proteo PodScan

The Problem:

Are you still working with paper POD's? Is matching the paperwork to the job, and retrieving the appropriate paperwork tedious, pricey and time-consuming processes? Has your business suffered due to errors while dealing with such paperwork? Are your people tired of answering phone calls from customers asking for more info on documentation?

Introducing Proteo PodScan

The POD scanning service reduces the time it takes to process your Proof of Deliveries by automating the matching and assigning the POD to the Order in Proteo Haulier Enterprise. The few which could not be automatically assigned, can be manually assigned by you.

PodScan service will remove staff time spent filing / retrieving transport documentation and make your business more efficient. It will also help you service your customers better. With the POD scanning and matching in place you will be able to invoice faster.

Save time, minimise errors and ensure PODs are available to staff and customers soon after delivery. And the best part is you pay based on the number pods you scan. A service that pays for itself, the more you scan the more you save, this service can grow as you do.

Helping you in the journey towards 'Going Paperless'.

- Simply scan your paperwork using any desktop or network scanner
- The system Combines the pages, Automatically matches and Assigns to Orders,
- Only manually match what is not automated
- An easy way to Search and filter you paperwork
- This service saves time, at least 25 hours per month.
