

MANAGING BY EXCEPTION

When your business is running well on the surface it is all too easy to just concentrate on the core focus **Collect - Deliver - Invoice**, hidden in those simple actions is a minefield of opportunity for loss. Combine this with the critical day to day decisions that need to be made to take advantage of the market opportunity and the pressure is on to get it right. Being able to understand which jobs are or were profitable and which jobs to sub out, having both real-time and historical data on which clients are worth keeping and which are not. All of that data is available as standard with Proteo Haulier Enterprise (HE). In fact, HE goes even further with its ability to customise more detailed profitability reports, these help you Optimize, Automate and Ultimately Increase the <u>Profitability</u> of the business.

The capability of being able to make fact-based decisions from high visibility data reduces or can remove the risk of poor service delivery, reduce loss and increase margins in an industry that is already stretched.

Proteo Haulier Enterprise (HE) have developed high visibility data functionality which is spread throughout the platform and exposes valuable real-time data that allows you to see how your business is doing. Key areas such as the <u>Arrivals Board</u> powered by dynamic data from <u>Proteo Mobile</u>, this gives you a real-time status view of every delivery. Reports that pro-actively show data such as "Jobs with Demurrage", All Uninvoiced Work for a Client, All Work for Subcontractor in real-time and much more.

To learn more about how Haulier Enterprise will work for you, call for information and demo.
