

Haulier Enterprise – Client Portal

As the title suggests, The Client Portal is all about the ability for the customer and the Haulier to electronically communicate and forms a part of the 2-way integration capability of The Platform.

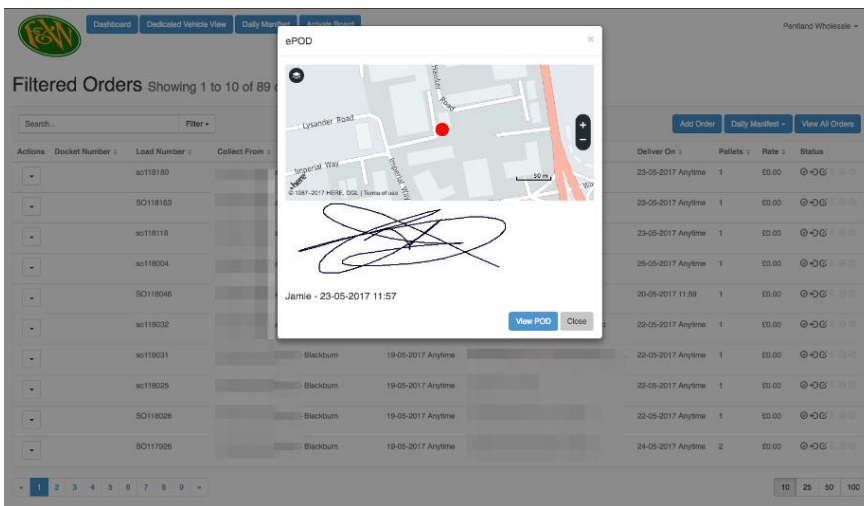

Traditionally a customer would have to wait until their collections & deliveries were complete and all documentation was made available by the haulier, by granting access to the Client Portal, the customer now has real time access when deliveries are made, subject to the In-Cab capabilities of the business.

This would also be the same location for any scanned form of documentation to be deposited by the haulier and retrieved by the customer together with retrieval of the hauliers Daily Manifest.

Benefits

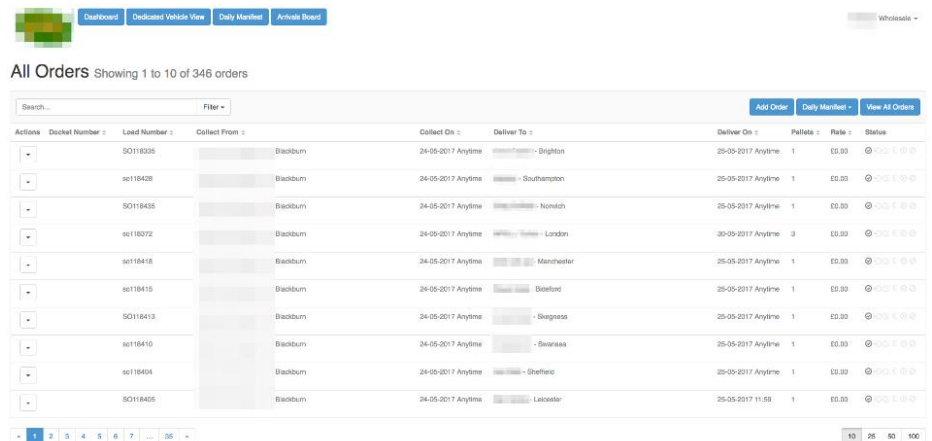

- Two-way documentation access
- EDI Capability
- Reduction in communication
- POD / Invoice Access
- Daily Manifest
- Customer - Value Added Service
- Saves time Traffic Office Time
- Access via Secure Logon
