Haulier Enterprise – Capture Extras

Small miscellaneous charges are often missed and with the challenges that face today's Haulage industry, capturing these charges can make the difference between profit or loss.

Haulier HE provides the Planning Office and the Accounts Team with the ability to add or capture these charges and present these on a separate or combined invoice along with any % Fuel Sur-Charge that may need to be applied on a customer by customer basis

The complexities of recording these amounts on a Spreadsheet system can lead to human error, where Haulier HE is in operation, the user is prompted to address these issues during the Delivery and Collection Planning process.
