## CAPTURING EXTRAS

Haulier Enterprise (HE) is not just another Transport Management System (TMS), HE provides the features and functionality as standard that you as a haulier constantly pressurise your existing provider to deliver. Proteo works very closely with its valued clients and understands the issues that matter such as the **ability to [Capture Extra Charges/Costs](#) that directly improve your bottom line.**

At the very point of adding an order, your planners are prompted with the opportunity to collect those charges that are often missed off the invoice. These charges include **AM Delivery charges -Bridge Fees – Saturday Delivery Charges, Tail Life, and others.** To avoid any possible delay in your customer clearing an invoice, HE again prompts the planners to present these charges on a separate invoice.

Other areas where margins are impacted are extended waiting times where Collections & Deliveries are concerned, in this instance **Time is Money and utilisation of vehicles paramount.** Using Proteo Mobile, HE has automated the prompted need to claim Demurrage by initiating a message in real-time back to the planner from the driver to kick in the charge.

**Because we do understand the impact of your [profitability](#), we constantly improve HE to work more effectively for the business, capturing extras is only one area where you will experience improvement. Call me today and learn more.**
