### **How to fit your Hive thermostat frame:**

1. Press the tab at the base of your thermostat
2. Remove thermostat from backplate by lifting it off the hooks
3. Hold thermostat in one hand with the dial in your palm
4. With the other hand squeeze together the two 'tabs' sticking out of the back of the device
5. You can then push the frame off the back of the thermostat
6. The new frame should be slid on from the back of the thermostat and clicked into place.
