

Hive Signal Booster

User guide

Hive Signal Booster

Your Hive Signal Booster will help your other Hive devices talk to each other, by extending the range of your system.

Getting started:

- 1 Choose a location**

Your Hive Signal Booster should be plugged into a mains power socket about half way between your Hive Hub and the device that has low signal strength or can't connect.

2

Plug your Hive Signal Booster in and switch the power socket on

The light on the front will begin to flash amber whilst the Hive Signal Booster searches for your hub.

3

Add your Hive Signal Booster

You can do this using your Hive app or the online dashboard.

Using the Hive app:

- Open the Hive app on your smartphone or tablet, you may be asked to log-in.
- Tap the **Menu** button and then **Install device**. Your hub will then start looking for your Hive Signal Booster.

Using the online dashboard:

- Log into your account at **hivehome.com**

- Under **Settings** select **Install devices**. Your hub will then start looking for your Hive Signal Booster.

Once your Hive Signal Booster appears on the screen, you can name it and press **Save** to complete setup.

4

That's it!

The LED light on your Hive Signal Booster will now be green and your Hive devices will automatically talk to your hub.

Remember: Once your Hive Signal Booster is installed, please leave the power to it switched on, including the extension cable if you're using one.

Usage

Your Hive Signal Booster is designed for UK household wiring, and for indoor use only. Under normal use conditions this product should be kept at least 20cm away from the body of the user.

Maintenance

Disconnect your Hive Signal Booster before cleaning and keep it away from water and other liquids at all times. The Hive Signal Booster does not contain any serviceable parts so do not attempt to open it.

Can we help?

Max. radiated power: <10 dBm.
Frequency: 2405 - 2480 MHz

To avoid environmental and health problems due to hazardous substances in electrical and electronic goods, appliances marked with a crossed out wheeled bin should not be placed into your household rubbish bin. Instead, when they are unable to be re-used, they should be recycled. Your local authority will be able to advise you on the location of the nearest recycling centre that is authorised to accept this type of waste. Please recycle responsibly.
