Date of issuing:

STAMP & SIGNATURE

My pet that I am travelling with has a vaccination and my pet is travelling no sooner than 21 days after the initial rabies vaccination is administered.

VI. RABIES ANTIBODY TITRATION TEST

I, the undersigned, confirm that I have seen an official record stating that the rabies antibody titration test performed at an EU-approved laboratory on a sample of blood collected on the date mentioned below from the described animal proved a response to anti-rabies vaccination at a level of serum neutralising antibody equal to or greater than 0.5 IU/ml.

Sample collected on:

Name of the authorised veterinarian:

Address:

Telephone number:

Date:

STAMP & SIGNATURE

All pets must have had treatment against the tapeworm *Echinococcus multilocularis*, where your destination area is free from this tapeworm (Finland, Ireland, Malta, Norway and Northern Ireland).

! This pet travel checklist is only guidance, when travelling with your pet every owner is responsible to comply with the pet travel rules of the country the customer is travelling to so please check all the rules and regulations with relevant governments.

For detailed information please visit:

https://europa.eu/youreurope/citizens/travel/carry/animal-plant/index_en.htm

*European pet passports are issued for dogs, cats and ferrets only. If you are travelling to another EU country with any other pets, such as birds, ornamental aquatic animals, reptiles, rodents or rabbits, [check the national rules](#) of the country you are planning to visit for information on the entry conditions.
