# Finding the right FCC capital solution

FCC has an established suite of capital solutions to support the agriculture and food sector.

| If you're exploring... | FCC capital solution | How it may fit | Get in touch |
|---|---|---|---|
| **Financing for a farm operation** | **Core agriculture lending** | FCC offers financing and services for farmers, ranchers, growers and other primary producers. This can include support for credit lines, inputs, livestock, equipment, land and buildings, environmental solutions, young farmers, transition and other farm needs. | cocsc@fcc-fac.ca |
| **Financing for an agribusiness or food business** | **Corporate, commercial lending** | For many agri-businesses (farm suppliers and equipment builders) and food processors, traditional lending is the best place to start. FCC can support a range of agribusiness financing needs, including equipment, inventory, expansion, construction, real property, operating needs and growth plans. For larger-scale financing, FCC may also participate in syndicated credit facilities. | cocsc@fcc-fac.ca |
| **A partnership-based financing solution** | **Alliances** | Alliances extends FCC's reach through strategic partnerships by third party financing that provides specialized financing programs, lending support and customer-focused solutions. Through these partnerships, FCC can help customers access financing options that support growth, equipment purchases, operating needs and other business objectives. | alliances@fcc-fac.ca |
| **Growth capital for a high-growth, high-impact business** | **Strategic Finance** | If your business is growing, modernizing or transforming, Strategic Finance may offer flexible capital beyond traditional lending. This can include options such as venture debt, mezzanine financing or convertible debentures.[+] | invest@fcc-fac.ca |
| **Equity investment for a high-growth company** | **FCC Capital – direct and fund investments** | Equity investments may be an option for agribusiness, ag tech, sustainable agriculture or food companies with strong growth potential, export opportunities or scalable innovation. This focuses on investing in a company, rather than financing a standalone project.[*+] | invest@fcc-fac.ca |
| **An agri-food project** | **Agri-Food Project Finance** | For situations where financing is built around a standalone project or asset, and repayment depends on the project's future performance. It's designed for capital-intensive projects that can strengthen Canada's agri-food system, such as added processing capacity, domestic ingredient production or food system resilience.[^] | projectfinance@fcc-fac.ca |

FCC does not offer grants or subsidies, and its strategy is focused on agriculture and food.

+ FCC has convened a coalition of more than 20 private, institutional investors who have collectively pledged to deploy $5 billion to Canadian agriculture and food by 2030. Most of these investors have strategies that align with the two FCC capital solutions noted above and are looking to deploy their capital alongside FCC.

* This includes FCC's commitment to invest $2 billion by 2030 to help build more innovation across Canadian ag and food.

^ This includes an additional FCC commitment of $1 billion to finance agri-food projects. It is part of Canada's National Food Security Strategy.
