CRYPTOPOLIS
WHITEPAPER 2.0

CRYPTO
POLIS

Hey, welcome to the Tower

"You look kinda lost! Where did you come from exactly? Oh.. Right. Hmmhm. So that means you want to become one of us! You don't? Well, I think once you know what we are all about you will change your mind! We do have some space in the cellars still, the room might not be your ideal place of living, but it should do the trick for now I guess. Ah, whatever your rise to fame here in Cryptopolis might be or become, I am happy to see you join this starscraper of wealth and opportunity!

I believe in you, new Cryptopian. See you around!

A true game for everyone

Cryptopolis is a crypto-driven, free-to-play social NFT game where fun and social connections take center stage. We're bridging the gap between Web2 and Web3 gaming by ensuring an easy entry for everyone.

In Cryptopolis, you create and care for your own customizable avatar, meeting their needs for happiness. Collect NFTs, make friends, trade, play mini-games, complete quests, and join community events to build a life of wealth, health, and fun for your digital companion.

Note: This whitepaper's content is subject to change. Not all gameplay features are available at this writing, and some may evolve based on community feedback. Cryptopolis is in early access, and our roadmap may change. Any features not yet in the game shouldn't be considered final.
Our Mission

A game that bridges the gap between Web2 and Web3

From the inception of Cryptopolis, our goal has been to create a social MMO that unites traditional social gamers with NFT and crypto enthusiasts from the Web3 community. We've made it possible for anyone to join the fun, even without prior crypto or NFT knowledge, by allowing easy account creation and native token purchase in our Tower. The future of crypto gaming lies in simplification and regulation, creating a safe space for fun, friendship, and income opportunities.

With Cryptopolis, we want to create our own metaverse. A place where all walks of life can meet, challenge, play, interact, and socialize.

Welcome to the future of gaming. Where the entertainment of traditional gaming is merged with the financial opportunities of crypto and NFT driven projects.

We need more chips to unravel the secrets of the "Machine" time to get back on the grind!
~Drakaia

Use your well earned chips for a spin in the "Machine" and maybe this is the day that your life will change for the better!

This ancient machine is located in the library. So take your chances if you dare!

Story and Features of Cryptopolis

The story of Cryptopolis:

The Tower of Cryptopolis remains an enigmatic structure, its peak hidden from view, and its builder unknown. Some even suggest it might be an infinite Starscraper. Lower levels are veiled in thick fog, while higher ones enjoy sunlight.

Within the Tower, various districts unite around their beliefs about its origins, each facing unique challenges. But is there a top floor? In Cryptopolis, certainty is elusive, as inhabitants form groups with different views on the Tower's history. Historically, these perspectives led to disputes, but lately, an uneasy truce prevails.

Your task is to uncover the Tower's truth, relying on social currency and actual wealth. Can you ascend with smart choices and determination? What awaits on higher levels, and is there a definitive truth?

It's time to discern reality in Cryptopolis. It's your journey, Cryptopian. Forge connections and fortunes, all while unraveling the Tower's mysteries.

We'll share more about guilds and districts as development progresses.

Features in Cryptopolis:

In Cryptopolis, you can enjoy various activities to advance through the Tower. Key features include:

- Engage in multiplayer minigames with $CPO stakes.
- Complete quest lines for Prestige and in-game currency rewards.
- Trade your NFTs for $CPO, chips, or other NFTs with fellow players.
- Decorate your room with NFTs to meet your character's needs.
- Establish a Tower business, catering to inhabitants and generating profits.
- Explore public spaces, forge new friendships, and embark on fresh quests.
- Earn in-game chips through various work opportunities.
- Elevate your Prestige rank for access to new quests, public spaces, and NFTs.
- Utilize in-game chips at The Machine in the Bookchain Library to acquire NFT rewards.

All these features intertwine with our character progression system (Prestige) and your Avatar's Needs. Your Avatar's actions are influenced by their mood, and fulfilling their needs, such as eating or resting, takes precedence before other tasks. NFTs play a crucial role in keeping your Character content and productive, helping you earn $CPO and in-game chips.
Please note that not all features are in the Early Access version of the game and will be added over the coming months. To stay up to date with development and new patches, make sure you follow our social channels.

Character Needs

How your Character Needs influence your gameplay.

Everything in Cryptopolis begins and ends with your Character. Just like in real life, he or she has needs that have to be sustained to ensure you can do all the things you want to do in the Tower. Your Character has the following Needs:

ENERGY

SOCIAL

HYGIENE

COMFORT

FUN

What happens when my Character is unhappy?

Like in real life, when you feel down and out, you might not want to do certain things. Ever tried playing a match in 8-ball pool while you were hungry or sleepy? Or baking pizzas for money? That's no fun! And your Character will let you know so. Once your Character is unhappy, they might decline to do certain actions. This could be working for in-game Chips, playing mini-games, or doing quests. It's up to you to keep them happy with the use of your utility NFTs.

Note: Some clothing items can increase the rate at which one of your Needs increases, and they might decrease the decay rate. It's up to you to find out which ones and what they exactly do, so get to work, Cryptopian!

CRYPTO POLIS

Prestige

How your Prestige level influences the world around you.

In the Tower, your Prestige is paramount. It reflects your social standing, wealth, skills, and overall status. As you climb higher, you'll meet influential figures and discover new opportunities, like fresh mini-games, public spaces, NFTs, and chances to earn $CPO.

How do I gain Prestige?

You can earn Prestige by completing quests, achievements, skill-based NFTs, and playing mini-games. Some clothing items can boost Prestige gain rates, and experimenting with combinations may reveal hidden utilities for faster level advancement.

Why is my Prestige important?

By gaining Prestige, you unlock new content in the game. The things you can unlock are the following:

• New public spaces where you can unlock additional quests, mini-games, or ways to make in-game Chips.
• New interactions.
• Community events that are only accessible for certain Prestige levels.

During special events, certain public spaces might only be accessible for higher Prestige level players. This way, we can ensure our most loyal players are rewarded for their time and work in the Tower.

Skills

How your Skills help you progress through the Tower.

Once you start your journey in Cryptopolis, it's time to create your Character, and you can set your starting skill set. In our Tower, your Character Skills matter!

MY PROFILE

6

Jacy Sathosi

Don't worry: Jacy aint dangerous. She only tries to sell you a brand new couch when you first enter the tower.

But trying her on Red Light Green Light may be the last mistake you make before going home broke!

CHANGE OUTFIT

FITNESS	
CHARISMA	
HOMEMAKING	
HANDINESS	
LOGIC	
ARTISTIC	

Why are my Skills important?

In the Tower, access to activities is skill-dependent. To play specific mini-games or join tournaments, you must meet skill prerequisites, such as Logic for chess or Handiness level for the 8-ball pool tournament. Enhancing your Skills ensures your Character remains content for longer period.

Rarer skill-driven NFT items can raise your Skills to greater heights. Therefore, obtaining top-tier Room Items becomes crucial once you reach your Skill limits.

Certain Clothing NFTs are essential for using specific skill-driven NFTs. For instance, Fitness Skill requires tracksuits or sneakers, while a Tuxedo in the Token Night Club accelerates Charisma growth. Keep an eye out for the latest fashion, as some public spaces with skill-enhancing opportunities may require specific Clothing items.

CRYPTO POLIS

Rooms

Create the palace or business of your dreams.

The most coveted asset in Cryptopolis is real estate. As new residents join the Tower daily, space becomes scarcer. Want to be a real estate tycoon? Here's your opportunity!

Upon your first game entry, our Concierge will provide you with a free Starter Room, albeit a compact one. It allows you to embark on your Cryptopolis journey without spending a dime.

With each significant game update, we introduce new floor plans to our in-game economy. Our primary focus is to maintain a balance between available Rooms and the Tower's monthly active users, ensuring that Rooms remain the most valuable asset in the Tower.

Room Rarity

In Cryptopolis, we have certain rarity levels for our rooms, and outside the game and on Trading screens, they are displayed in a card style. Please note that all Rooms are unique and can be identified by their unique serial number. This ensures that every Room is unique and truly yours. The rarity levels are:

| UNCOMMON	RARE	EPIC	LEGENDARY
IRO	IRO	IRO	IRO
000001/000059	000001/000047	000001/000030	000001/000015

Why is my Room important?

Your Room serves as a central hub in Cryptopolis. It's where you store NFTs, relax, socialize, and enjoy home-based mini-games. Additionally, you can own multiple Rooms, with some potentially serving as personal businesses!

CRYPTO
POLIS

Owning a business

If you've acquired valuable skill-driven NFTs, consider starting a gym in your Rare Room to offer Fitness Skill training or launch a restaurant to satisfy Hunger Needs. Your creativity sets the only limits, and you can advertise in our Room Navigation Directory to grow your business rapidly!

Some players have become real estate moguls in Cryptopolis by owning Rooms of various rarities. Finding the right players for bigger places is key, as living or starting a business in higher rarities is exceptionally rare.

Please note that moving into multiple Rooms is not currently possible but is a planned feature on our roadmap.

Chandelier

Cryptopolis _ Rooms

Cryptopolis has a wide range of different rooms that each have their own rarity.

Try to get to top by buying the best room and display all your rare NFTs

How do I get a bigger Room?

You can obtain higher rarity Rooms in multiple ways: through our Opensea IRO, trading with other players, or winning them in future in-game competitions. There's even a slim chance of getting a Room from the Bookchain Library's Machine!

Importantly, Rooms are accessible to all, not restricted by Skill or Prestige levels.

CRYPTO POLIS

Room Items

How Room Item NFTs Enhance Your Tower Journey.

Your Room's functionality depends on Room Item NFTs. Each Room Item is a unique NFT with specific utilities. They help maintain your Character's happiness and extend their activity duration. Rarer Room Items offer longer-lasting benefits, providing a reason to aim for fortune through trading.
In the Trading screen outside the game, Room Items are represented in a card style, each with a unique serial number, ensuring genuine ownership.

New and unique Room Items are regularly introduced in significant game updates, some with hidden abilities and buffs.

Room Item Rarities:

Clothing

Get ready, Cryptopians! It's time to party and express your personality through your fashion choices in Cryptopolis. Clothing, like Furniture and Rooms, comes in various rarity levels. Some items might have hidden utilities, but in general, they're here to make your character look cool. Trade with others to get that desired item or use the Machine in the Bookchain library to try and snag some Rare jeans. You could even start your own Clothing store with your collection. The possibilities are endless – show the Tower your fashionista side!

Clothing Rarities:

Minigames

A significant way to ascend the Tower and amass more $CPO is by playing games in Cryptopolis. Our residents thrive on challenges, and what's a bigger challenge than staking your hard-earned $CPO to win more?

Cryptopolis Minigames.

In the Tower, you'll discover various minigames that can boost your $CPO stash. Most of these games are turn-based to minimize issues like ping abuse. When real-time minigames are introduced, we'll ensure that players close to each other in the real world are grouped together. Some minigames are winner-takes-all multiplayer, while others are score attack challenges where you aim to beat the top high score and win $CPO.

Upcoming Cryptopolis Minigames:

• Chess
• Pool
• Red light green light
• And more!

Note: More minigames will be added, so stay in touch on our socials and be up to date!

Trading

Trading is a primary way to get Room Items, Rooms, or Clothing items in the Cryptopolis Tower. Many residents here may have what you're after!

To trade, simply click on another player's Character and hit the trade button if they have something you want. You'll spot a listing icon next to their name if they have items for sale. Our Tower doesn't have a centralized marketplace, encouraging players to create themed Rooms (Clothing store, Cooking store, Gym equipment store) and search for sellers while exploring.

Why Trading is important

In the Tower, trading is the most effective way to get better Items. You can trade NFT Items for $CPO and in-game Chips or barter with your own Items. While boosterpacks and the Library Machine offer random NFT Items, Trading is the only way to target the specific Item you want. Explore the Tower, inquire with other players, visit upcoming player-run businesses, or even consider starting your own store. Trade your way to success, and we'll see you at higher levels soon!

$CPO

Where there's $CPO there are opportunities. $CPO is our native currency, used for various purposes:

- Play minigames: Wager $CPO against other players for a chance to win more.
- Trading: Buy and sell Items with other players using $CPO.
- Rent Items: Pay other players to use their Items, or earn passive income by renting out your own.
- Buy boosterpacks: These packs contain five random Items from a collection, with higher rarity packs increasing your chances of finding rare Items. You can sell them or use them to advance in the Tower.

Chips

The in-game currency that keeps you engaged and well-fed!
Besides our native crypto currency $CPO, we have Chips. You can earn them by working in public spaces, completing quests, or choosing them as payment when trading items. Here's how you can use Chips:

- The Machine: Feed Chips to the Ancient Machine in the Bookchain Library for a chance to receive a random NFT, which you can use or sell to other players.
- Consumables: Visit the Restaurant and use Chips to buy high-quality food and drinks to keep your Character satisfied and progressing.
- Trading: If you have plenty of $CPO but need Chips to meet your Character's Needs, you can request Chips instead of $CPO during trades.

Note: Not all features are inside the game yet. We'll continue adding more uses for Chips during development, so stay tuned for updates!

Tokenomics

The total supply of $CPO is 1.5 billion tokens.
Our $CPO token has been launched on the 18th of October 2021 with our incubator.

Our public price was launched at $0.01 USD.

NOTE: All of our presale tokens are 100% unlocked. No new tokens will come in circulation.
