

**TABULAR REPORT**  
**NPA3529**

**PREPARED FOR:**

**Equis Labs**

**Colorado Hispanic Voters**

**September 2022**

## OVERVIEW

The following is a tabular report of a hybrid live interviewer telephone (69%) and text to web (31%) survey among 500 Hispanic registered voters in Colorado. Interviews were conducted in both English and Spanish (1%). The survey was conducted from September 8-14, 2022 following procedures established by Normington, Petts & Associates.

All polls are subject to errors caused by interviewing a sample of persons, rather than the entire population. In 95 cases out of 100, the responses to this survey should fall within  $\pm 4.4$  percentage points of those that would have been obtained from interviewing the entire population of Hispanic registered voters in Colorado. The sampling error for subgroups of the survey will be greater.

As with any survey, the release of selected figures from this report without the analysis that explains their meaning could be damaging to Normington, Petts & Associates. Therefore, we reserve the right to correct any erroneous or misleading release of this data in any medium through the release of correct data or analysis.

The data have been weighted by sex, age, party within region, urbanicity and general election vote history to better reflect the composition of the electorate.
