DESCRIPTION

The DF20 combines lightweight portability with professional-grade performance. Its efficient gear-driven transmission delivers smooth, consistent grinding across concrete and coated surfaces, while the reverse function adds flexibility for varied applications. Designed for tight spaces and stair transport, the front-mounted transport system makes moving the machine effortless. Adjustable side weights allow for increased head pressure when needed, enhancing grinding effectiveness. Built-in LED lights ensure clear visibility, and a dust-proof shroud helps maintain a cleaner, safer jobsite. Ideal for both residential and commercial surface prep.
