

MCEC Technology and AV Inclusions

Where innovative design and technology come together

Let's work together
to design technology
solutions that will
elevate your event
and enhance your
delegates' experience.

With access to the latest event technology and trends, our technology team are an endless source of inspiration. We'll find ways to incorporate innovative technologies that allow your attendees to learn and network in new and exciting ways.

Our standard inclusions

- A dedicated Technology Planner
- Pre-installed technology
- Free visitor WiFi
- 24/7 onsite technical support

Pre-installed technology

We include the latest audio-visual, communication and information technology equipment.

Pre-installed equipment is included in every meeting and event space as part of your venue hire. This includes a high definition projector or LCD screen, presentation computer with internet access, sound system and intelligent lectern with attached microphones.

The intelligent lectern is your personal command centre. From the lectern, speakers can control the room at their fingertips, including the lighting, climate, technology and remote assistance.

Bringing your event to life

Your Technology Planner will work with you to find exciting ways to incorporate the latest trends and technologies into your event, enhancing your delegates' experience and elevating your speakers or performers.

Audio

Whether you need a wireless microphone for a single presenter or several for a panel session we have the right audio options available to ensure your presenters are heard loud and clear.

Vision

Our spaces are designed with maximum flexibility. We can accommodate a range of screen sizes and layouts ensuring unobstructed sight lines for all your delegates.

We also offer vision switching solutions, ensuring your presentation, presenter and video content displays seamlessly on screen.

Lighting

Enhance your audience's experience with an impressive lighting display. Your Technology Planner will work with you to create an atmosphere that has maximum impact for your delegates.

Rigging

There are a range of options available for hanging items. Your Technology Planner can assist you with suggested locations and the most cost effective solution.

Staging

Whether you're organising a speaker session, panel discussion or live performer we offer a range of stage heights and sizes to meet your requirements.

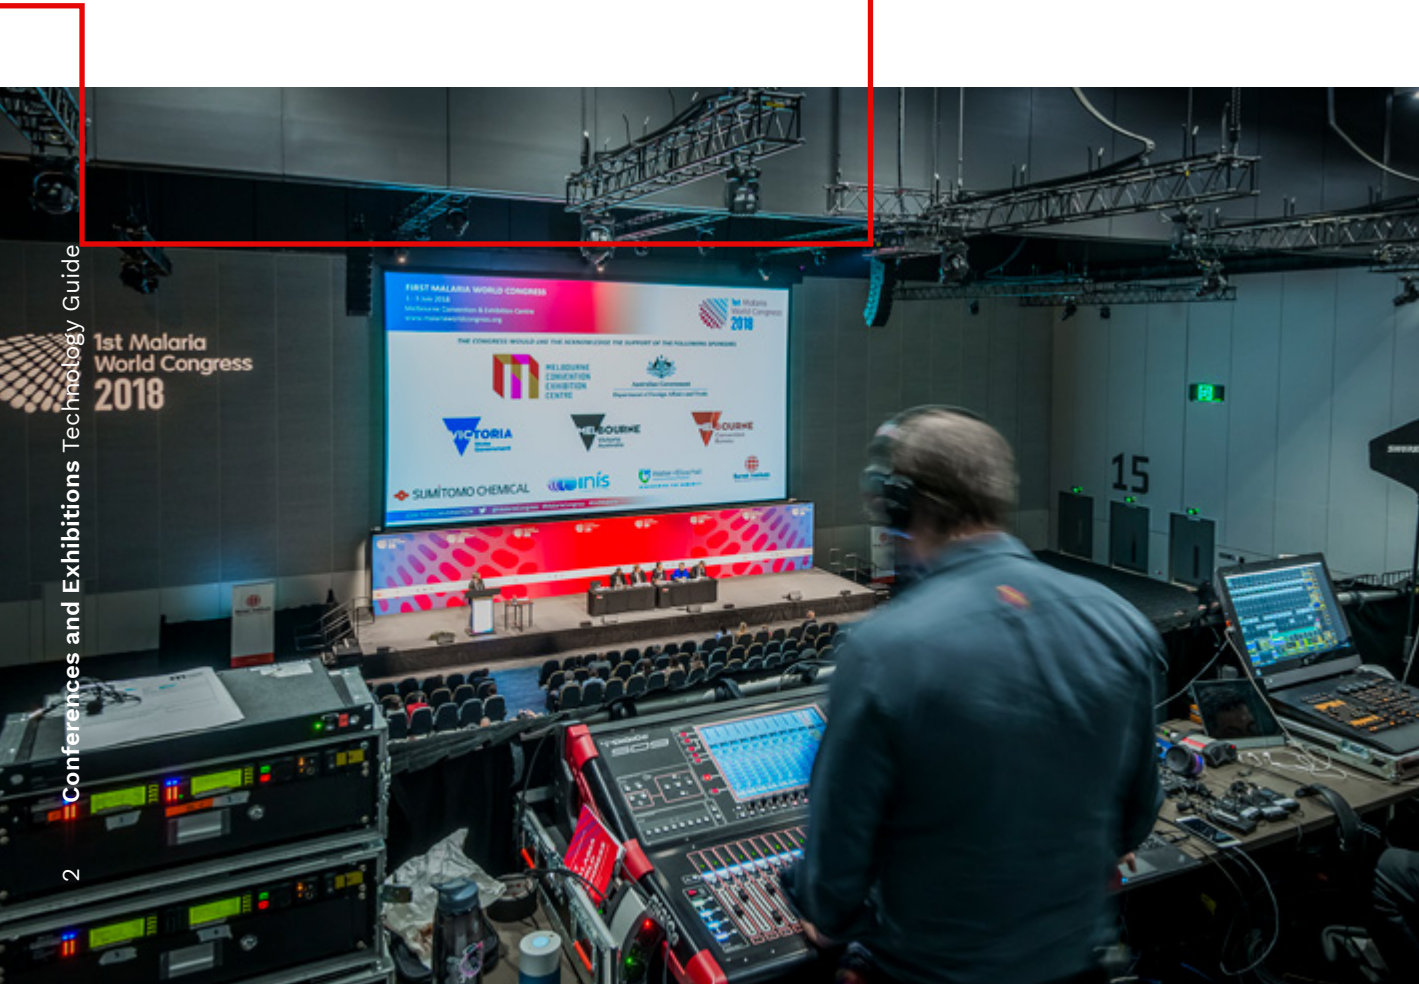

Speaker preparation service

Reduce the stress of coordinating your speakers' presentations with our speaker preparation service.

Our dedicated speaker preparation rooms provides a central location for presenters to load, edit and practise their presentations. You will also be notified if presenters are yet to provide their presentation for a session.

Live View

Live View allows you to view live camera feeds from all of your session rooms on a single screen. Live View can be located at your registration desk, in your speaker preparation room, organiser's offices, or any room included in your space hire plan.

Our innovative technology allows you to extend the event experience by connecting with those who can't make it.

Room recording and broadcasting

We can provide you with options for hybrid events such as webinars, live streaming and video conferencing.

Camera to screen

Add impact to your event and improve sight lines by broadcasting your presenter on the main screen.

Video conferencing

Whether you require a boardroom video conference or need to accommodate a remote guest speaker, video conferencing can link two locations with two-way audio and video communication.

Web streaming

Reach and engage with a wider audience by streaming your presentations online with perfectly synchronised audio, video and presentation slides.

There are a range of services available including live and on-demand packages.

Audio recording

Turn your sessions into a podcast or keep an audio recording to listen to later. There are two audio recording options available – an in room recording with a dedicated audio technician or a control room recording with remote monitoring.

Broadcast camera recording

A broadcast camera provides you with a high quality recording of your event that's suitable for broadcast with multiple file types available.

Main screen recording

A main screen record provides you with a high definition recording of the screen content of your event. This option is enhanced when your content includes multiple vision sources such as camera, presentations and video.

Synchronised content recording

Capture your screen content and presenter using a broadcast camera with perfectly synchronised audio, video and presentation slides.

Signage and branding

Lectern signage

The front of your lectern allows for your company or event branding to be displayed in your event spaces.

Digital signage and door cards

Digital wayfinding signage is located throughout the venue to guide your guests to your event space. Digital door cards outside your event space display your event branding and session information.

Digital totems

Digital Totems are located in the main foyer spaces and can be used to promote your conference. Use of the totems are subject to your space hire plan and availability.

Banners

There are a range of options available for hanging banners in the meeting rooms, Melbourne Room, Plenary, Sovereign Room and Goldfields Theatre.

Technical assistance

At the start of your conference we'll step you through how to use our preinstalled technology and help you to load your presentation. Help is close at hand throughout your event with onsite support from our in-house technology team.

Depending on your event, we may recommend that you have roving technology assistants who can manage multiple event spaces. Your dedicated technician will provide an immediate response when required. There may be circumstances where we recommend having a dedicated room operator to deliver your event requirements.

Additional services to help keep your event running smoothly

- Speaker timer
- Laser pointers or remote presenter control
- Q&A microphones
- Whiteboards and flipcharts
- Lapel microphones
- Head table microphones
- Presenter fold back screens – to allow your presenters to clearly see on-screen content from the lectern or stage.

Unlimited data internet services

Free WiFi

MCEC’s free venue WiFi offers limited bandwidth with timed access, enabling visitors to check emails or undertake light web browsing.

Our free Wi-Fi is not a suitable option for event delivery, as there is no available on-site support and it comes with time and bandwidth restrictions. For any event requiring Wi-Fi, you'll need one of our internet packages which are built for seamless event delivery.

Internet services

Our internet services are built with the success of your event in mind. We all know things can go wrong, that's why we have resiliency and redundancy built into our internet offerings. Our network and providers all have back-up services, to ensure your event does not skip a beat. Choose from multiple connectivity packages to create the right web accessibility for your event, either wired or unwired.

Other key components of our internet packages include:

- Unlimited data - so you don’t have to worry about being charged for data usage.
- Ability to customise your landing page.
- On-site support.

Settings and configurations

We offer unrestricted internet access on all wired and wireless internet services using automatic DHCP addressing. Public IP addressing is also available on request. Wi-Fi networks are provided using the latest 802.11ac technology

Security

We offer WPA2 encryption on Wi-Fi networks.
