Californie:

La Silicon Valley est le hub principal de Google, Facebook, Microsoft et d'autres géants de la tech. Il n'est donc pas surprenant de constater que la Californie est un des Etats les plus avancés en matière d'IA. L'IA devient de plus en plus indispensable, jusqu'à devenir presque pré-requise lors de levées de fonds auprès des Venture Capitalist. C'est également un des Etats avec les règles les plus strictes sur le traitement des données personnelles.
