1. INTRODUCTION

The purpose of this release is to introduce improvements to the previous production version, 23.2.0. The production release version is 23.4.0.

The previous release included the following updates:

- UX facelift with enhanced visuals and touchscreen support
- EMV and contactless kernel updates
- Payment Card Core update to 4.3.0
- Fix for terminal reboot on some magnetic stripe cards
- Allow maximum JSONPOS Print height of 4096-pixel rows
- Localize configurator screens.
- Other fixes and improvements
- For information or questions regarding this release, please contact your local support team or Account Manager. For further information on the terminal range, please consult the user guides/quick guides on the Nets website.

The information shall not be used, published, or redistributed without the prior, written consent of Nets A/S.

This release is for:

- › The Npay software
- › Terminal models: V3M2 Mobile, V3P3 Cashier (Castles Technology)
